I The Educational Goals of the Graduate School of Engineering Science

Both science and engineering have a mission to directly contribute to the welfare and sustainable development of human society. Our graduate school believes that engineers and researchers play crucial roles in pioneering new industries and science fields that lead toward a brighter future while accurately assessing various social needs and addressing environmental and other global challenges. With the goal of serving as an international hub of practical science, the school aims to foster globally competitive professionals that are well versed in both science and engineering with sound ethics and enterprising spirits to learn beyond their areas of expertise.

In our master's programs, students build their foundation in a wide range of science fields, in addition to acquiring advanced knowledge and skills in the courses designed for their own areas of expertise. They also engage in research to develop original technologies and acquire new knowledge. In this manner, they are expected to grow into highly advanced and professional engineers and researchers who can identify their own research agenda and make comprehensive judgments flexibly to respond to unknown problems based on their broad perspectives.

In our doctoral programs, students engage in advanced scientific and technical research regarding the challenges that they have identified. They are expected to grow into pioneering leaders in science and industry with abilities to make comprehensive judgments based on their broad perspectives and communicate their findings throughout our society. In other words, our graduate school produces creative and highly specialized leaders who will drive further innovations.

II Education Programs and Curriculum at the Graduate School of Engineering Science

II-1 Education Programs at the Graduate School of Engineering Science

The Graduate School of Engineering Science offers four education programs (Figure 1).

Firstly, the **T-type Engineering Degree (TED)** Program overcomes the shortcomings of excessively specialized and conventional I-shaped engineering education by offering broader perspectives. Our education model has undergone reform and moved away from parochial specialization towards a more integrated engineering education that combines a high degree of specialization and broad perspectives. The vertical line of the letter T from the TED Program represents the students' in-depth research in their area of expertise at their assigned laboratories. Students must write a master's or doctoral thesis in this program, which aims to produce highly advanced engineers and researchers. Once they have completed the program, students are awarded a master's or doctoral degree in engineering.

Secondly, the **Pi-type Engineering Degree (PED)** Program is a unique education method applied in Japan for the first time. The program is designed to produce practical engineers and researchers who can turn innovations resulting from the advancement of sciences and technologies into advanced manufacturing.

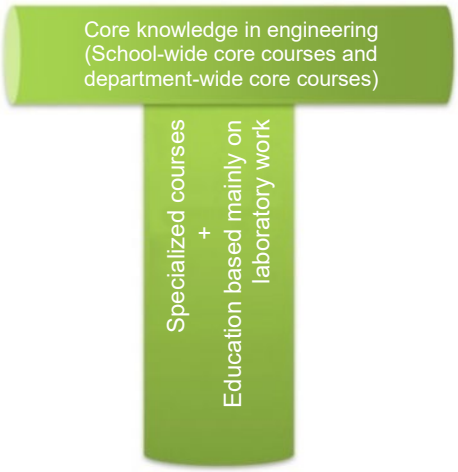
As the symbol of Pi (Π) from the PED Program represents, basic knowledge in engineering (horizontal line of Π) is combined with more than one module of specialization (two vertical lines of Π). Such a unique Yokohama-style graduate education system produces practical engineers and researchers who can respond to challenges faced by today's diversified and highly advanced industrial society. In our master's programs, students take coursework consisting of laboratory courses, exercises, and training (including long-term internship) instead of writing a master's thesis or being assigned to specific laboratories. Once they have completed the program, students are awarded a master's degree in engineering. In the doctoral programs, students are required to write a doctoral thesis, which is reviewed by keeping in mind that students are expected to become practical researchers who will lead advanced manufacturing. Once they have completed the program, students are awarded a doctoral degree in engineering.

Thirdly, YNU's original Professional Science Degree (PSD) Program enables students to acquire various necessary skills in our industrial society through workshops and internships organized to utilize the strengths of our universities while referring to the graduate education programs in science as advocated by the National Professional Science Master's Association (NPSMA). Based on their advanced knowledge in basic science, students will pursue the truth in natural science and contribute to the development of science-oriented industries in anticipation of the technological innovation for the next 10 to 20 years. They are also expected to develop knowledge in both science and engineering, as well as adequate language and other skills for working globally. In the program, workshops and internship are organized for science students of physics and chemistry to help them acquire the skills that are needed by companies. Once they have completed the program, students are awarded a master's or doctoral degree in science.

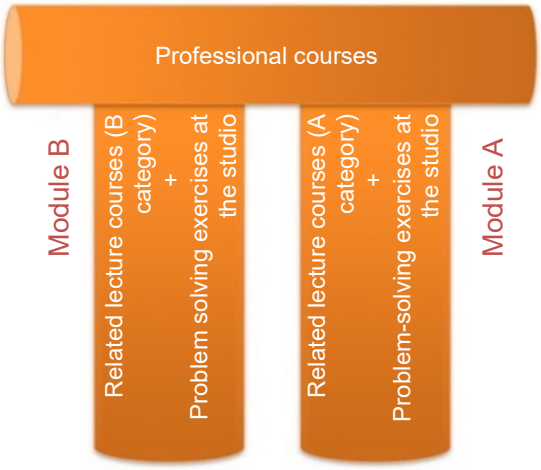
Lastly, the Science Degree Program produces deep thinkers with good judgment and advanced expertise in modern mathematics who not only pursue the truth in mathematical science, but also contribute to the development of science-oriented industries in anticipation of the technological innovation for the next 10 to 20 years. The education program is designed to apply advanced mathematical science, which is a constant and important driving force of innovation in our rapidly evolving information society. Students of mathematics are awarded a master's or doctoral degree in science.

Successful completion of the program is judged mainly based on their master's or doctoral theses.

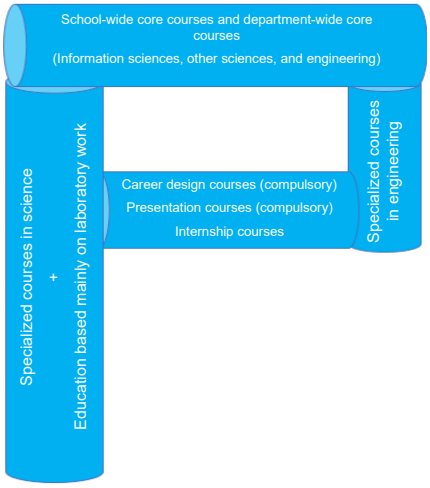
T-type Engineering Degree (TED) Program



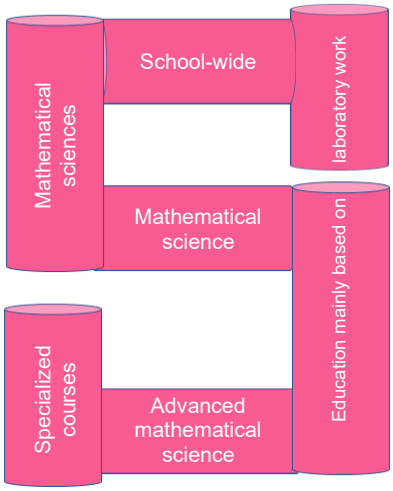
Pi-type Engineering Degree (PED) Program



Professional Science Degree (PSD) Program



Science Degree Program



(Figure 1) Structures of TED, PED, PSD, and Science Degree Programs at the Graduate School of Engineering Science

II-2 Curriculum at the Graduate School of Engineering Science (Departments and Specializations)

The departments of the Graduate Schools of Engineering Science are shown below along with the specializations covered.

Master's programs

Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering
	Materials Science Frontier
	Systems Design for Ocean-Space
	Aerospace Engineering
Chemistry and Life Science	Chemistry
	Applied Chemistry
	Chemistry Applications and Life Science
	Energy and Sustainable Chemistry
Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences
	Physics
	Applied Physics
	Information Systems
	Electrical and Computer Engineering

Doctoral programs

Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering
	Materials Science Frontier
	Systems Design for Ocean-Space
	Energy Materials
Chemistry and Life Science	Chemistry
	Applied Chemistry
	Chemistry Applications and Life Science
	Energy Materials
Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences
	Physics
	Applied Physics
	Information Systems
	Electrical and Computer Engineering

II-3 List of Education Programs by Department and Their Descriptions

Programs offered by each department of the Graduate School of Engineering Science are described below.

The parts marked by * apply only to master's programs. The parts marked by ** apply only to doctoral programs.

Program	Awarded degree	Description	Mechanical Engineering, Materials Science, and Ocean Engineering					Chemistry and Life Science					Mathematics, Physics, Electrical Engineering and Computer Science				
			Mechanical Engineering	Materials Science Frontier	Systems Design for Ocean-Space	Aerospace Engineering	Energy Materials	Chemistry	Applied Chemistry	Chemistry Applications and Life Science	Energy and Sustainable Chemistry	Energy Materials	Mathematical Sciences	Physics	Applied Physics	Information Systems	Electrical and Computer Engineering
TED	Engineering	(T-type Engineering Degree Program) In-depth education in the area of specialization is combined with education to lay the foundation in a broad range of areas, including other fields.	○	○	○	○ *	○ **		○	○	○ *	○ **			○	○	○
PED	Engineering	(Pi-type Engineering Degree Program) Practical education is offered in a combination of modules, each of which systematically integrates a studio (laboratory courses, exercises, and training related directly to manufacturing and conducted in a small team) with related lecture courses. In master's programs, studio deliverables are mainly used to prepare portfolios in place of a master's thesis.	○	○	○	○ *				○					○	○	○
PSD	Science	(Science education with an eye to future engineering: Professional Science Degree Program) The programs aim to produce professionals with knowledge in basic science to drive technological innovation and science-oriented industries, as well as skills to work globally.						○						○			
Science	Science	(Science Degree Program) The programs produce professionals who can apply their knowledge in mathematical science and contribute to the development of science-oriented industries in anticipation of technological innovation.											○				

III Common Rules in the Graduate School

III-1 Enrollment Procedure

1. Procedures for Course Registration

Before registration, students make the Course Registration Plan in advance and get permission from the supervisor. Students cannot take courses without first enrolling through the Educational Affairs Information System (EAIS). They will not receive any grades (credits) for such courses either, even if they have passed the examinations.

Course Registration Plan Sheet should be downloaded from YNU Learning Management System (YNU-LMS).

After getting permission (permission date needed) from supervisor, submit to Graduate School of Engineering Science Section through the YNU-LMS.

Connect to the YNU's Educational Affairs Information System from your web browser and enter the time schedule code of the course that you want to enroll in.

Go to the top page of the YNU website and login to the Educational Affairs Information System by choosing YNU > Campus Life > Y's Net for Students > Educational Affairs Information System (http://www.ynu.ac.jp/campus/student_only/affairs_system.html).

Off-campus enrollment is also possible by logging into the Educational Affairs Information System via the YNU VPN Service at the Information Technology Service Center (https://www.itsc.ynu.ac.jp/network/ynu-vpn.html).

(1) Enrollment period

Spring semester:	April 8 (Monday)–April 19 (Friday)	9:00–23:00
Fall semester:	October 4 (Friday)–October 17 (Thursday)	9:00–23:00

* Submit your Course Registration Plan to the Graduate School of Engineering Science Section by the following date. Make sure to keep one copy for yourself.
Submission deadline Spring semester: April 22 (Monday) Fall semester: October 18 (Friday)

(2) Enrollment confirmation and modification period

Spring semester:	May 6 (Monday)–May 8 (Wednesday)	9:00–23:00
Fall semester:	October 23 (Wednesday)–October 25 (Friday)	9:00–23:00

* Make sure that your courses have been registered according to your enrollment plan. Any mistakes in registration or errors with the courses should be fixed by adding or deleting courses in the Educational Affairs Information System. The EAIS is not available during the enrollment cancellation period, if there are some registration errors.

(3) Enrollment cancellation period

Spring semester:	May 13 (Monday)–May 17 (Friday)	9:00–23:00
Fall semester:	November 11 (Monday)–November 15 (Friday)	9:00–23:00

* You may cancel (delete) your enrollment for a particular course in the Educational Affairs Information System if the course turns out to be completely different from what you expected or for any other reasons. If you abandon a course halfway without cancelling the enrollment, you will receive "F (Fail)" as your grade for that course. You can only cancel courses during the enrollment cancellation period.

* If you modify or cancel your enrollment after the enrollment registration period, make sure to submit your revised Course Registration Plan after confirming with your academic advisor. The deadline is May 20 (Monday) for the spring semester and November 18 (Monday) for the fall semester.

2. General Note Regarding Enrollment

1) Courses must be registered by the specified deadline for both spring and fall semesters. In principle, the registered courses in the enrollment plan that you have submitted cannot be changed.
2) You may not take courses that you have not enrolled in.
3) You may not enroll in two or more courses in the same time slot.
4) year-long courses (offered in both spring and fall semesters) cannot be taken only in the spring or fall semester.
5) After receiving credits from a course, you cannot take the course again.

3. Course Overview

(1) Outline of each course (syllabus)

1) The basic information on each course is electronically published, along with the course objective, course plan, learning activities beyond class hours, study goals and targets, grading method, and the way the class is conducted. Starting from courses offered in academic year 2010, syllabuses can be searched by college, school, or teacher, or using any keyword. Students can browse syllabuses on the Educational Affairs Information System, which contains different items than syllabuses that are available to the public.

(2) The time schedule at the Graduate School of Engineering Science

1) The time schedule at the Graduate School of Engineering Science is not distributed in the form of a brochure.
2) Browse the schedule on the website of the Graduate School of Engineering Science (https://www.fse.ynu.ac.jp/english/students/index.html). Any date and classroom name not indicated for a course on the time schedule will be announced on the bulletin board, etc., as soon as they are finalized.

4. Course Numbering

The numbering code is a number used to indicate the specialization and level of difficulty for each course. (For more details, go to the top page of the YNU website > Education and Research > Educational Activities > Graduate Education Policy: YNU Initiative.)

* Numbering rule

<table>
<tr><th>Digit</th><th colspan="2">Indication</th><th>Alphanumeric notation</th></tr>
<tr><td>First and second digits</td><td>School</td><td>Graduate School of Engineering Science</td><td>ES*****</td></tr>
<tr><td rowspan="4">Third digit</td><td rowspan="4">Department and course (school-wide, department-wide, or specialized)</td><td>School-wide</td><td>ESa****</td></tr>
<tr><td>Mechanical Engineering, Materials Science, and Ocean Engineering</td><td>ESb****–ESe****</td></tr>
<tr><td>Chemistry and Life Science</td><td>ESf****–ESi****</td></tr>
<tr><td>Mathematics, Physics, Electrical Engineering and Computer Science</td><td>ESj****–ESm****</td></tr>
<tr><td rowspan="2">Fourth digit</td><td rowspan="2">Learning level</td><td rowspan="2">Level code of course</td><td>ES*4****–ES*6***</td></tr>
<tr><td>ES*9***</td></tr>
<tr><td rowspan="2">Fifth to seventh digits</td><td colspan="3">Numbering according to the specialization of lecture courses</td></tr>
<tr><td colspan="2">Numbering of non-lecture courses according to the specialization and type of course
* The fifth digit is fixed at "0," the sixth digit indicates the specialization, and the seventh digit indicates the type of course</td><td>ES**0**</td></tr>
</table>

5. Standard Class Hours per Course

Standard class hours per credit for a course are determined as follows:

1) For each lecture or exercise course, one credit is usually awarded for every 15-class hours, but some exercises award one credit for every 30-class hours.
2) For experiments, laboratory courses, and practices, one credit is usually awarded for every 30-class hours. If deemed necessary for educational purposes, some experiments and laboratory work award one credit for every 45-class hours.
3) If one course combines lectures, exercises, experiments, laboratory work, or practices, the number of awarded credits is calculated based on the number of class hours according to the combination of learning activities.

6. Examinations

1) The examination periods are defined in the academic calendar (*).
2) As a rule, the examination for each course is conducted on the day of the week and hour specified in the time schedule.
3) In general, no class will be conducted except for examinations during the examination period, with the exception of some classes.
4) Please obey the following rules when you are taking an examination:
   - During an examination, display your student ID on your desk.
   - Disciplinary action will be taken for any misconducts during an examination pursuant to Article 24 of the Graduate School General Regulation.

* The academic calendar of YNU is organized in two semesters and six terms. Courses are offered either by semester or by term. The Graduate School of Engineering Science conducts courses in two semesters—spring and fall. (Some courses are conducted by term system.)

7. Credit Recognition and Grades

1) Grades are determined based on scores from examinations and written assignments.
2) As a general rule, no additional or make-up examinations will be held.
3) Check your grades in the Educational Affairs Information System. Grades from the spring semester are available from the first day of the fall semester in early October, while grades from the fall semester are available from the first day of the spring semester in early April of the next academic year.
4) The completion of a program requires a GPA (Grade Point Average) of 2.0. In order to calculate the GPA, a grade point is assigned to each grade. The grade point of each course taken by a student is multiplied with the number of credits assigned for that course. The student's GPA is the sum of all the courses taken divided by the total number of credits for the enrolled courses.
5) The number of credits from cancelled courses is deducted from the number of credits from registered courses. The grade for any abandoned course after the specified cancellation deadline will be "F (Fail)."
6) You can retake a course if you have received a grade of "F (Fail)." If the course is successfully completed, the grade from the retaken course is counted in the GPA, although the number of credits from that course will not be added to the denominator for calculating the GPA.

Grade	Grade Point	Score	Pass/Fail
Excellent *	4.5	100–90	Pass
Very good *	4	89–80	
Good	3	79–70	
Fair	2	69–60	
Fail	0	59–0	Fail

$$\text{GPA} = \frac{\Sigma\ (\text{GP} \times \text{Number of credits})}{\text{Total number of credits from registered courses}}$$

* Grading criteria
The grade of "Excellent" with scores of 90 or more is awarded for surpassing the learning goals.
The grade of "Very Good" with scores between 80 and 89 is awarded for achieving the learning goals.

7) Please contact Graduate School of Engineering Science Section, if you have any questions about the grades of the courses you took in each semester.

8. Registration for Internship course

Students who participate in the internship as a class subject of Graduate School of Engineering Science can register for the internship course and earn credits. Before taking the course, please consult with the teaching staff in charge of academic affairs.

Students who take the Internship course should be submitted “Internship Report” to the Graduate School of Engineering Science Section by the YNU-LMS, after implementation of the internship immediately.

Necessary designated form should be downloaded from the YNU-LMS.

9. Enrollment of College-level Courses

Master's programs

In the Graduate School of Engineering Science, master's students in TED, PSD, and Science Programs may substitute up to 10 credits from specialized courses with credits from college-level courses according to the instruction or advice from their advisors. (The PED Program allows students to take college-level courses, but the credits cannot be counted towards the completion of the program.)

Enrollment is possible only with the following specified courses. The number of assigned credits is as indicated for each course.

Note that the **specialization in mechanical engineering** for both TED and PED Programs does not permit the enrollment of college-level courses.

Department	Specified Course	
	Course Name	Note
Mechanical Engineering, Materials Science, and Ocean Engineering	Internal Combustion Engines Steel: microstructure and metallurgy X-ray Diffraction in Materials Science Physical Metallurgy and Exercise I Physical Metallurgy and Exercise II Strength of Crystalline Solids Strength and Fracture of Materials Electronic Properties of Solids Mathematical Theory of Plasticity Metal Forming Solidification Theory Computational Materials Science	
Chemistry and Life Science	Physical Organic Chemistry Introduction to Solid Surface Chemistry ※1 Introduction to Solid State Physics Quantum Chemistry Coordination Chemistry Fundamental Biochemistry ※3 Cosmogeochemistry Synthetic Organic Chemistry Design of Organic Synthesis ※4 Electrochemistry B Inorganic Solid State Chemistry Function of Polymers ※5 Structure and Properties of Polymers ※5 Inorganic Material Chemistry Chemistry of Organic Functional Materials Polymer Chemistry ※6 Fundamental Catalytic Chemistry Applied Electrochemistry	※1: Not permitted to take in case of having already taken “Introduction to Solid State Physics (6C3213Z)“ ※2: English title undetermined ※3: Not permitted to take in case of having already taken “Structural Biochemistry” ※4: Not permitted to take in case of having already taken “Synthetic Organic Chemistry (6C3221Z)” ※5: Not permitted to take in case of having already taken “Polymer Chemistry Ⅱ” or “Function and Properties of Polymers” ※6: Not permitted to take in case of having already taken “Polymer Chemistry Ⅰ” or “Polymer Chemistry (6H3217Z and 6C3223A)” ※7: Not permitted to take in case of having already taken “Analytical Chemistry Ⅲ”

	Analytical Chemistry ⅡB ※7 Design and Drawing of Machinery and Apparatus 有機工業化学 ※8※2 ファインセラミックス産業と先端技術 ※8※2 Thermodynamics for energy conversion Engineering Materials Process System Engineering Strength and Fracture of Materials Safety Engineering for Energetic Materials Energy System Engineering ※9 Separation science and engineering Fluid engineering Risk engineering Environmental Engineering 1 Chemical Reaction Engineering Bioengineering 1 Bioengineering 2	※8: Not permitted to take in case of having already taken “Introduction to Industrial Chemistry” ※9: Not permitted to take in case of having already taken “Environmental and Energy System Theory”
Mathematics, Physics, Electrical Engineering and Computer Science	Advanced Electrical and Computer Engineering Electrical Energy System Engineering Power Electronics Basic Control Theory 基礎制御理論 ※10 Basic Control Theory 基礎制御論 ※11 Semiconductor Engineering Electronic Devices Integrated electronics Optoelectronics Electromagnetic Wave Engineering Digital Communication Soft Computing Quantum Statistical Mechanics Quantum Mechanics 3 Electromagnetism 3 Solid State Physics Advanced Solid State Physics High Energy Physics Galois Theory and Number Theory Manifold Theory Functional analysis Probability Theory with Applications Stochastic Models Engineering Mathematics Statistics	※10: For Electrical and Computer Engineering EP and Computer Science and Engineering EP ※11: For Physics and Applied Physics EP. Not permitted to take in case of having already taken “Basic Control Theory (6Z2214A)”

Doctoral programs

Students of doctoral programs may not take college-level courses except for courses of foreign languages (introductory level) and Japanese language (note that credits from these courses are not counted towards the completion of programs).

10. List of Items to be Submitted

The following lists items to be submitted from admission until graduation, along with the submission period and place of submission.

Master's programs

Submission period	Required document	Target programs	Place of submission	Remarks
Beginning of each academic year	Research Guidance Plan and Research Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Create after sufficient discussion with the supervisor
Enrollment period for the spring semester in the first year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be approved by the academic advisor.
Enrollment period for the fall semester in the first year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be approved by the academic advisor.
After the fall semester in the first year	Studio deliverables	PED	Affiliated laboratory	Deliverables from studio courses taken in one year
Enrollment period for the spring semester in the second year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be approved by the academic advisor.
Enrollment period for the fall semester in the second year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be approved by the academic advisor.
After the fall semester in the second year	Studio deliverables	PED	Affiliated laboratory	Deliverables from studio courses taken in one year
After implementation of the internship	Internship report	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Students who take the internship course should be submitted it by mail.
Deadline specified by each specialization	Master's thesis	TED, PSD, SD	According to the instruction given in each specialization	
	Portfolio	PED		

Doctoral programs

Submission period	Required document	Target programs	Place of submission	Remarks
Beginning of each academic year	Research Guidance Plan and Research Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Create after sufficient discussion with the supervisor
Enrollment period for the spring/fall semester	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be approved by the academic advisor.
After the fall semester	Studio deliverables	PED	Affiliated laboratory	Deliverables from studio courses taken in one year
After implementation of the internship	Internship report	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Students who take the internship course should be submitted it by mail.
Year of completion	Doctoral thesis	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Detailed instructions from the Graduate School of Engineering Science will be provided by the academic advisor.

III-2 Foreign Language Courses

1. Enrollment of Introductory Foreign Language Courses (University-wide)

Students who wish to enroll in foreign language courses should consult with the Graduate School of Engineering Science Section in advance.

Note that undergraduate students are given priorities in the enrollment of introductory foreign language courses. Anyone interested will be informed of available courses after checking the enrollment by undergraduate students. Enroll in available courses during the period for enrollment and modification.

2. Enrollment of Japanese Language Courses

Japanese language courses are intended for international students.

International students must take placement tests (so that they can be placed in suitable classes).After placement, enroll in the Japanese language courses offered by the International Student Center. (If credits are needed, take Japanese language courses for international exchange. If not, take university-wide Japanese language courses.)

Check the schedule of placement tests on the website of the International Student Center (https://isc.ynu.ac.jp).

3. Credits from Foreign Language Courses

Credits from Introductory Foreign Language Courses and Japanese Language Courses are not counted as credits needed to complete a study program.

III-3 Graduate General Education and Minor Programs

Graduate General Education： Graduate school general education programs foster both skills and knowledge suitable for a master course student. Students with different academic backgrounds, irrespective of the major humanities/sciences division, will meet in a class. They will cultivate practical thinking and research competency manageable not only globally but also locally. For more details, go to the page of

https://www.yec.ynu.ac.jp/gsec/

Minor programs are offered to meet the diverse learning needs of students and to motivate them by acknowledging the outcome of their systematic learning in specific areas through specific assignments. Students who satisfy the requirements to complete the program are awarded certificates, and the completion is stated in their transcripts. Requirements for enrollment vary from one program to another. For more details, go to the page of https://www.ynu.ac.jp/education/ynu_education/vice_special.html.

III-4 Important Notes for International Students

1) Make sure to confirm the information from the Global Promotion Division regarding the orientation for incoming international students organized at the beginning of each semester (April and October).
2) Please try to learn Japanese as most courses at the Graduate School of Engineering Science are offered in Japanese, although some courses are offered in English. There are also other regular courses related to Japanese language that are offered at YNU. For more information, please refer to the website of the International Student Center (https://isc.ynu.ac.jp/study/).
3) Some departments offer lectures designed for international students. Make the most of this opportunity by following the instruction and advice from your advisor.
4) Lectures offered at a college can be taken if the intended research requires the relevant basic knowledge provided in those lectures. Take those lectures as necessary according to the instruction and advice from your advisor. (Refer to "Enrollment to college-level courses" on page 8.)
5) Join an appropriate insurance as you may experience illness, accident, or unexpected trouble during your study period.
6) Matters related to scholarships, dormitories, and the welfare of international students are handled by the Student Support Division and the Global Promotion Division of the Student Affairs and International Relations Department (both located on the second floor of the International Student Center). If necessary, consult these divisions or the Graduate School of Engineering Science Section.
7) A tutor is assigned to each international student during the first year of their studies. Make the most of the assistance from the tutor by consulting all matters related to your study program.

IV T-type Engineering Degree (TED) Program, Professional Science Degree (PSD) Program, and Science Degree Program

IV-1 Process from the Planning of Enrollment and Research to Graduation (Obtaining the Degree)

1. Purpose

Students of the T-type Engineering Degree (TED) Program, Professional Science Degree (PSD) Program, and Science Degree Program are assigned to laboratories for in-depth specialized learning. The research and education are conducted mainly in the form of courses and instructions on writing a thesis.

Courses offered in master's programs are classified into categories and types mainly according to their contents and intended targets. Categories mainly depend on the contents of courses and are divided into information course group, science course group, engineering course group, and professional course group.

Types mainly depend on the intended target and are divided into core courses, major courses, and specialized courses.

The study and research in these courses must be planned to clarify the purpose for enrolling in a master's or doctoral program and to achieve the purpose (obtaining a degree).

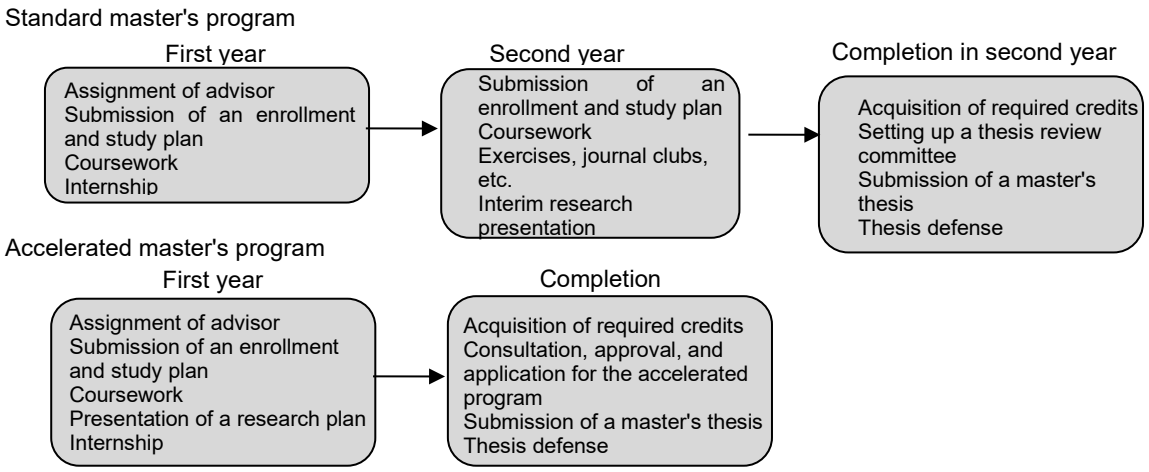
2. Academic Advisors and the Study Plan (Enrollment and Research)

1) An academic advisor is assigned immediately after a student is admitted to a program.
2) Each student must develop a Course Registration Plan according to the purpose of their study, academic background, and learning ability while seeking due guidance and advice from the advisor, and obtain approval. In addition, make the research plan after sufficient discussion with supervisor.
3) Complete the enrollment within the enrollment period and submit the Course Registration Plan approved by the academic advisor attached (refer to page 5). In addition, submit the Research Guidance Plan and Research Plan.
4) Refer to page 5 to learn how to enroll in courses.
   The Course Registration Plan must be followed through in each academic year.
5) The progress of the plan must be discussed with the academic advisor in each academic year.

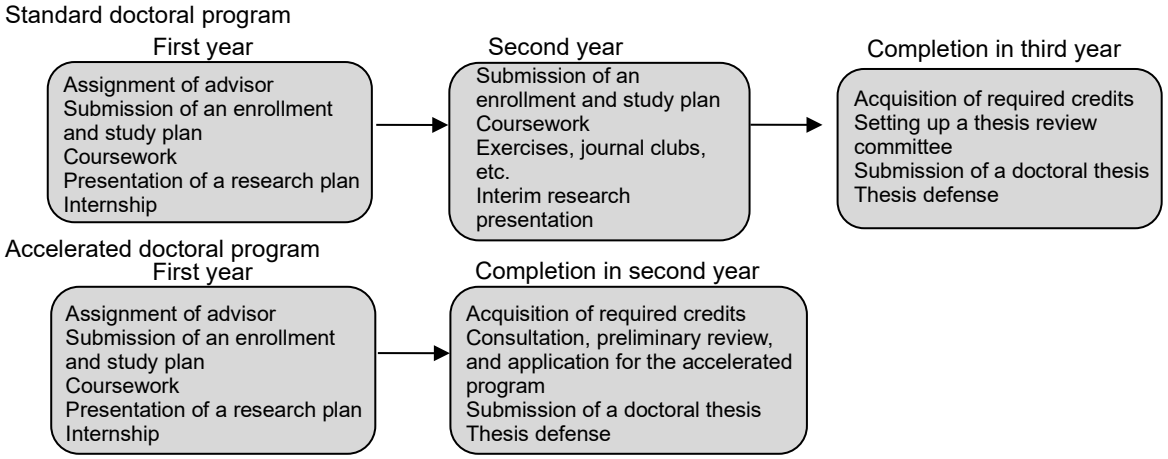
3. Flow of Study

Study refers to students' initiatives to learn and academically train themselves. The flows of study at our master's and doctoral programs are presented below.

Flow of study in a master's program



Flow of study in a doctoral program



4. Requirements and Criteria for course completion

Requirements and Course Criteria for completing the master's and doctoral programs are described in the following table.

Master's programs

(1) Completion requirements

Matter	Requirements
Period of study	Be enrolled in the master's program for more than 2 years (See page 16 "7. Accelerated Programs" for accelerated completion.)
Required Credits	Earn 30 or more credits according to "(2) Course Criteria" below
GPA (Grade Point Average)	GPA must be 2.0 or higher throughout the period of study
Thesis	Receive the necessary research guidance, submit the master's thesis to the master's thesis defense, and pass it. (Reference to page 16 "8. Thesis")

(2) Course Criteria

Courses		Necessary number of credits	
Core courses	Information course group	At least 2 credits	At least 6 credits
	Science course group	At least 2 credits from courses or course groups specified by the department [*1]	
	Engineering course group		
	Professional course group		
Major courses	Information course group	At least 2 credits from courses or course groups specified by the department [*1]	At least 4 credits
	Science course group		
	Engineering course group		
Specialized courses		At least 10 credits from courses specified by the specialization. Exercise courses (4 credits in total) are required. [*2]	
Number of necessary credits (total)		At least 30 credits	

*1: The TED Program only requires credits from the engineering course group.

The PSD Program only requires credits from the science course group.

The Science Degree Program requires the following courses.

< Required core courses >

At least two credits from Mathematical Science:Algebra, Mathematical Science:Geometry, Mathematical Science: Analysis, and Mathematical Science:Data Science.

< Required major courses >

At least two credits from Advanced Mathematical Science:Algebra, Advanced Mathematical Science:Geometry,

Advanced Mathematical Science:Analysis, Advanced Mathematical Science:Probability A, Advanced Mathematical Science:Probability B, and Advanced Mathematical Science:Statistics.

*2: Refer to pages 28 through 37 to find out courses specified by each specialization and other required courses.

※ Courses from other specializations can be taken as department-wide specialized courses.

Doctoral programs

(1) Completion requirements

Matter	Requirements
Period of study	Be enrolled in the doctoral program for more than 3 years (See page 16 “7. Accelerated Programs” for accelerated completion.)
Required Credits	Earn 9 or more credits according to “(2) Course Criteria” below
GPA (Grade Point Average)	GPA must be 2.0 or higher throughout the period of study
Thesis	Receive the necessary research guidance, submit the doctoral thesis to the doctoral thesis defense, and pass it. (Reference to page 16 “8. Thesis”)

(2) Course Criteria

Courses	Necessary number of credits
Advanced exercises	3 credits
Number of necessary credits (total)	At least 9 credits

5. Cross-enrollment Between Master's and Doctoral Programs

Master's programs

Students of master's programs may not take courses offered in doctoral programs.

Doctoral programs

Students of doctoral programs may take lecture courses offered in master's programs according to the guidance and advice from their advisors (lectures only).

6. Enrollment in Courses Offered by Other Graduate Schools or Other Universities

Master's and doctoral programs

According to the guidance and advice from their advisors, students can register by taking courses offered at other departments in the Graduate School of Engineering Science, as well as Graduate General Education, Graduate School of Urban Innovation, Graduate School of Environment and Information Science, Graduate School of Education, Graduate School of International Social Sciences (up to six credits only), and other graduate schools from partner universities of YNU for credit transfers (lectures only).

Regarding credits taken, they could be included to specialized courses (up to 15 credits) among the necessary number of credits to complete in Master’s program. Also in doctoral program, could be included.

Prior to any such enrollment, contact the Graduate School of Engineering Science Section. The enrollment cannot be made without the approval of the faculty responsible for the intended course.

※In this regard, with limits of 20 credits total including credits already taken in college.

7. Accelerated Programs

Master's programs

A standard master's program lasts two years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

Doctoral programs

A standard doctoral program lasts three years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

8. Thesis

No credits are given for thesis in order to obtain a degree.

(1) Thesis defense and more

Students who are certain that they satisfy the requirements for completing their master's or doctoral programs must apply for a thesis defense. The application must be filed while they are still enrolled. Submission deadlines for applications are described below. Students will receive notifications on the procedure and schedule for completing each program at appropriate timings from the Graduate School of Engineering Science Section through their academic advisors. For more details on the thesis defense, refer to the Thesis Defense Regulation of YNU's Graduate School of Engineering Science.

Master's programs	Doctoral programs
Follow the deadlines specified according to specializations	December for completion in March March for completion in June June for completion in September September for completion in December

(2) Awarded degrees and specializations

The following academic degrees are awarded according to the department in which a master's or doctoral program is completed.

Program	Department	Specialization	Degree
Master's program	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Master of Engineering
		Materials Science Frontier	Master of Engineering
		Systems Design for Ocean-Space	Master of Engineering
		Aerospace Engineering	Master of Engineering
	Chemistry and Life Science	Chemistry	Master of Science
		Applied Chemistry	Master of Engineering
		Chemistry Applications and Life Science	Master of Engineering
		Energy and Sustainable Chemistry	Master of Engineering
	Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences	Master of Science
		Physics	Master of Science
		Applied Physics	Master of Engineering
		Information Systems	Master of Engineering
		Electrical and Computer Engineering	Master of Engineering
Doctoral programs	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Doctor of Engineering
		Materials Science Frontier	Doctor of Engineering
		Systems Design for Ocean-Space	Doctor of Engineering
		Energy Materials	Doctor of Engineering
	Chemistry and Life Science	Chemistry	Doctor of Science
		Applied Chemistry	Doctor of Engineering
		Chemistry Applications and Life Science	Doctor of Engineering
		Energy Materials	Doctor of Engineering
	Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences	Doctor of Science
		Physics	Doctor of Science
		Applied Physics	Doctor of Engineering
		Information Systems	Doctor of Engineering
		Electrical and Computer Engineering	Doctor of Engineering

(4) Evaluation criteria for theses

Theses are evaluated according to the following criteria by each department.

	Master's programs	Doctoral programs
Mechanical Engineering, Materials Science, and Ocean Engineering	Engineering (TED) 1. Original research that was conducted with a suitable choice of theme; 2. Results of the research make a significant academic or practical contribution; 3. Results are reliable; and 4. The reasoning, composition, and expression in the thesis are appropriate.	Engineering (TED) In addition to the evaluation criteria for master's programs described on the left: 1. The research produces new and advanced results that substantially contribute to the development of the field; and 2. The thesis content is good enough to be published in scientific journals.
Chemistry and Life Science	Engineering (TED) and Science (PSD) 1. The research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; 2. The methodology for the research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; and 3. The master's thesis is structured and written in a logical and original manner and produces significant results in academic or engineering terms.	Engineering (TED) and Science (PSD) 1. The research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; 2. The methodology for the research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; and 3. The doctoral thesis is structured and written in a logical and original manner, produces significant results in academic or engineering terms, and has a universal value.
Mathematics, Physics, Electrical Engineering and Computer Science	Engineering (TED), Science (PSD), and Science Degree 1. The research agenda of the thesis is useful in engineering terms, has a universal scientific value, or appropriate in other ways; 2. The research method in the thesis is appropriate (e.g., experiment method, calculation method, etc.); 3. Research results and consideration are appropriate, logical, and original; and 4. The structure and expressions used in the thesis are appropriate.	Engineering (TED), Science (PSD), and Science Degree 1. The research agenda of the thesis is useful in engineering terms, has a universal scientific value, or appropriate in other ways; 2. The research method in the thesis is appropriate (e.g., experiment method, calculation method, etc.); 3. Research results and consideration are appropriate, logical, and original; and 4. The structure and expressions used in the thesis are appropriate.

(5) Ethical review

Immediately before any doctoral thesis defense (a thesis revised after the preliminary review of all departments in the Graduate School of Engineering Science), the academic advisor will check that it has proper copyright protection by using iThenticate. The application is then submitted to the thesis review committee. Before the final review, the committee examines the thesis while also checking that proper consideration has been given to copyright. The committee states the review results in the doctoral thesis review report.

11. Working Students

The Graduate School of Engineering Science approves students who have applied for and been accepted into the Special Screening of Professionals (students who have been accepted by working adults) and who will continue to have a job after entering the program to an extended enrollment status.

The extended enrollment status refers to the completion of a course of study over a certain period of time beyond the standard duration for completing master's program (2 years) and doctoral program (3 years).
(Application procedure for the extended enrollment status must be completed prior to enrollment.)

The approved period of enrollment may be extended or shortened no more than once. Please consult with your academic advisor if you need to change your period of enrollment.

Please contact the Graduate School of Engineering Science Section for the procedure.

V Pi-type Engineering Degree (PED) Program

V-1 Process from the Planning of Enrollment and Research to Graduation (Obtaining the Degree)

1. Purpose

The advanced manufacturing pursued in PED Programs refers to the following set of activities by scientists and engineers who engage in creative designing:

- Develop the best system under multiple conflicting technical constraints.
- Incorporate results from advanced analysis and measurements into manufacturing accurately.
- Embody free and flexible ideas and concepts under given conditions.
- Conduct design and development based on accurate knowledge while considering the environment and safety.
- Apply basic principles and design future manufacturing to add specific functions.

The education and guidance under PED Programs are directed by the following basic policy to cultivate practical engineers and researchers who will lead advanced manufacturing.

(1) The education is mainly conducted through laboratory courses, exercises, and trainings in a small group. These activities that are directly linked with manufacturing are called "studios." As part of the studio work, we recommend doing long-term internships conducted at companies in close partnership with the Graduate School of Engineering Science.

(2) Students must take "modules" that are systematically composed of studios and internship courses.

According to this basic policy, no master's thesis is assigned in master-level PED Programs. The completion is judged based on the portfolio compiling the results from a studio. In each studio, a sufficient amount of time is designated for paper assignments and presentation guidance to strengthen students' logical thinking and scientific writing skills, as well as to cultivate the communication skills that are required for them to play active roles in the society as practitioners. Similar to other programs, each student is asked to write a doctoral thesis in doctor-level PED Programs, but they are evaluated as practitioners in pursuit of advanced manufacturing, rather than researchers who are engaging in basic research.

Before beginning their studies, each student must develop an adequate study plan to clarify the purpose for enrolling in a master's or doctoral program and to achieve the purpose (obtaining a degree).

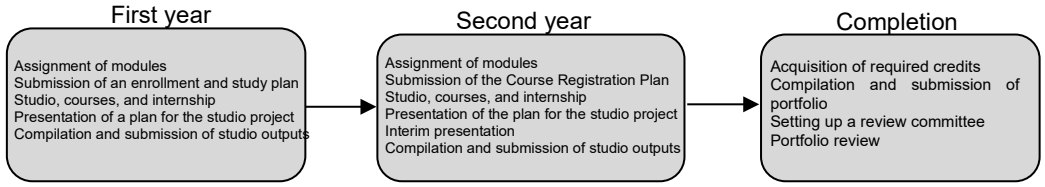
2. Academic Advisors and the Study Plan

1) Modules and an academic advisor are assigned immediately after a student is admitted to a program (with possible adjustments if there are more interested students than available space in respective modules).
2) Each student must develop a Course Registration Plan according to the purpose of their study, academic background, and learning ability while seeking due guidance and advice from the module manager of the assigned module or the academic advisor, and obtain approval. In addition, make the research plan after sufficient discussion with supervisor.
3) Complete the enrollment within the enrollment period and submit the enrollment and study plan approved by the academic advisor attached (refer to page 5). In addition, submit the Research Guidance Plan and Research Plan.
4) Refer to page 5 to learn how to enroll in courses.
5) The Course Registration Plan must be followed through in each academic year.
6) As necessary, the Course Registration Plan must be revised properly according to the guidance and advice from the module manager of the assigned module or the advisor.

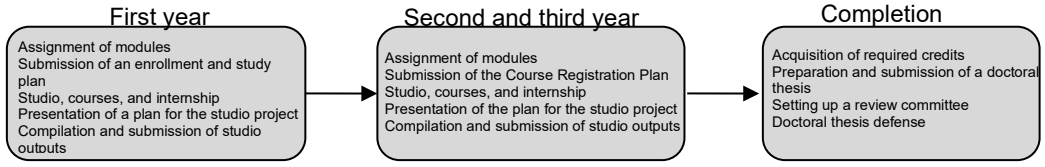
3. Flow of Study

The flow of study is outlined below.

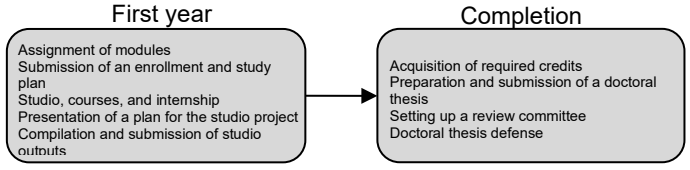
Flow of study in a master's program



Flow of study in a doctoral program



Accelerated program (mainly for working doctoral students with solid accomplishments)



4. Requirements and Criteria for course completion

Completion requirements and course criteria for completing the master's and doctoral programs are described in the following table.

Master's programs

(1) Completion requirements

Matter	Requirements
Period of study	Be enrolled in the master's program for more than 2 years (See page 24 "7. Accelerated Programs" for accelerated completion.)
Required Credits	Earn 30 or more credits according to "(2) Course Criteria" below
GPA (Grade Point Average)	GPA must be 2.0 or higher throughout the period of study
Thesis	Receive the necessary guidance and pass the master's degree defense based on a portfolio of studio results. (Reference to page 25 "8. Thesis")

(2)Course Criteria

<table>
<tr><td colspan="2">Courses</td><td colspan="2">Necessary number of credits</td></tr>
<tr><td rowspan="2">core courses</td><td>Information course group
Science course group
Engineering course group</td><td>At least 2 credits from information course group</td><td rowspan="2">At least 6 credits</td></tr>
<tr><td>Professional course group</td><td>2 credits required from "Multi-diciplinary Problem Based Learning in Graduate School of Engineering Science"</td></tr>
<tr><td colspan="2">Specialized module [*1]</td><td colspan="2">At least 4 modules (24 credits)
(Completion of 1 module requires at least 4 credits from studio courses and 2 credits from the course group that makes up the module [*3])</td></tr>
<tr><td colspan="2">Number of necessary credits (total)</td><td colspan="2">At least 30 credits</td></tr>
</table>

*1 Internship courses are assigned according to each assigned module in a master-level PED Program. They are conducted in close partnership with the manufacturing industry. The number of necessary credits is determined based on the internship period. Assignments are determined based on discussions between the partners and the Graduate School of Engineering Science. The school plans internship courses to accomplish the educational goals of the PED Program, so students can substitute one studio from a specialized module that is closely related to the internship assignment (pay attention to the note below marked with asterisk). For this reason, remember that an internship course that can substitute a studio course is different from any internship program carried out by students based on their free will and initiatives.

*2 A studio course that makes up a specialized module (master's program) is usually conducted in one semester. In principle, only one studio course from studio course hours can be taken in one semester.

*3 It is possible to take multiple subjects that make up the module in one semester.

The same subject cannot be used as a substitute for more than one specialized module.

* Note regarding the substitution of a studio course with an internship course

- Anyone who wishes to substitute a studio course with an internship course should register both courses during enrollment.
  [Time schedule code: N000000, Course name: Studio course (for substitution)]
- The module manager proposes the substitution of studio with internship to the academic affairs and library officer of the graduate school.
- Submit an internship report via email to the Graduate School of Engineering Science Section immediately after the completion of an internship program. After receiving the report, the Graduate School of Engineering Science Section will proceed to substitute the corresponding studio. The report template can be downloaded from the website of the Graduate School of Engineering Science.

Doctoral programs

(1) Completion requirements

Matter	Requirements
Period of study	Be enrolled in the doctoral program for more than 3 years (See page 24 “7. Accelerated Programs” for accelerated completion.)
Required Credits	Earn 9 or more credits according to “(2) Course Criteria” below
GPA (Grade Point Average)	GPA must be 2.0 or higher throughout the period of study
Thesis	Receive the necessary research guidance, submit the doctoral thesis to the doctoral thesis defense, and pass it. (Reference to page 25 “8. Thesis”)

(2)Course Criteria

Courses	Necessary number of credits
Specialized module (doctor) [*4,5]	At least 1 module (completion of 1 module requires at least 4 credits from studio courses and 2 credits from the course group that makes up the module)
Number of necessary credits (total)	At least 9 credits

*4 A doctoral thesis written and submitted to complete the Pi-type Engineering Degree (PED) Program is reviewed with respect to the candidate's level of achievement as a practice-oriented research. Similarly, the performance in a doctor-level studio course that makes up a specialized module is evaluated by a faculty group. The module will be offered until the candidate can demonstrate adequate accomplishment.

*5 For the same reason as above, an internship in the doctor-level PED Program is conducted in close partnership with the

manufacturing industry until the candidate can demonstrate adequate accomplishment. The internship can substitute one studio among special modules from the candidate's doctoral program that are closely related to the internship assignment.

5. Cross-enrollment Between Master's and Doctoral Programs

Master's programs

Students of master's programs may not take courses offered in doctoral programs.

Doctoral programs

Students of doctoral programs may take lecture courses offered in master's programs according to the guidance and advice from their advisors (lectures only) and include them among the necessary number of credits to complete.

Note however, that they cannot substitute lectures and other courses (two credits) that are needed to complete a specialized module.

6. Enrollment in Courses Offered by Other Graduate Schools or Other Universities

Master's and doctoral programs

According to the guidance and advice from their module managers and advisors, students can obtain credits by taking courses offered at the Graduate School of Engineering Science that are not included in their modules, Graduate General Education, and lecture courses offered at other graduate schools of YNU that are our credit transfer partners (Graduate School of Urban Innovation, Graduate School of Environment and Information Science, Graduate School of Education, and Graduate School of International Social Sciences), as well as other graduate schools from the partner universities of YNU for credit transfers(lectures only). Regarding credits taken, they could be included among the necessary number of credits to complete in doctoral program. Note however, that they cannot substitute lectures and other courses (two credits) that are needed to complete a specialized module.

Prior to any such enrollment, contact the Graduate School of Engineering Science Section. The enrollment cannot be made without the approval of the faculty responsible for the intended course. Students should obtain the approval of the instructor in charge of the course in advance.

7. Accelerated programs

Master's programs

A standard master's program lasts two years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

Doctoral programs

A standard doctoral program lasts three years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

8. Thesis

No credits are given for a portfolio developed during the master-level PED Program nor for a doctoral thesis written during the doctor-level PED Program for obtaining a degree.

(1) Thesis defense and more

Students who are certain that they satisfy the requirements for completing their master's or doctoral programs must apply for a portfolio review or thesis defense. The application must be filed while they are still enrolled. Submission deadlines for applications are described below. Students will receive notifications on the procedure and schedule for completing each program at appropriate timings from the Graduate School of Engineering Science Section through module managers or their academic advisors.

Master's programs	Doctoral programs
Follow the deadlines specified according to specializations	December for completion in March March for completion in June June for completion in September September for completion in December

(2) Awarded degrees and specializations

The following academic degrees are awarded according to the department in which a master's or doctoral program is completed.

Program	Department	Specialization	Degree
Master's program	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Master of Engineering
		Materials Science Frontier	Master of Engineering
		Systems Design for Ocean-Space	Master of Engineering
		Aerospace Engineering	Master of Engineering
	Chemistry and Life Science	Chemistry Applications and Life Science	Master of Engineering
	Mathematics, Physics, Electrical Engineering and Computer Science	Applied Physics	Master of Engineering
		Information Systems	Master of Engineering
		Electrical and Computer Engineering	Master of Engineering
Doctoral programs	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Doctor of Engineering
		Materials Science Frontier	Doctor of Engineering
		Systems Design for Ocean-Space	Doctor of Engineering
	Chemistry and Life Science	Chemistry Applications and Life Science	Doctor of Engineering
	Mathematics, Physics, Electrical Engineering and Computer Science	Applied Physics	Doctor of Engineering
		Information Systems	Doctor of Engineering
		Electrical and Computer Engineering	Doctor of Engineering

(3) Evaluation criteria for theses

Portfolios and theses are evaluated according to the following criteria by each department.

	Master's programs (portfolios)	Doctoral programs
Mechanical Engineering, Materials Science, and Ocean Engineering Chemistry and Life Science Mathematics, Physics, Electrical Engineering and Computer Science	1. Appropriate choice of theme and studio agenda 2. Results of the research make a significant academic or practical contribution 3. Results are acknowledged to have a high level of accomplishment and are reliable 4. The structure and expressions used in the portfolio are appropriate 5. Adequacy of literature 6. Consistent logical structure.	1. The research agenda of the thesis is useful in engineering terms or appropriate in other ways 2. The research method in the thesis is appropriate (e.g., experiment method, calculation method, etc.) 3. Research results and consideration are appropriate, logical, and original 4. The structure and expressions used in the thesis are appropriate.

Master's Programs Only

It is necessary to acquire the credits required for completion, implement any of the following 1 to 6, and submit the portfolio that includes the results.

1. Work in more than one laboratory or under a sub-supervisor in addition to their supervisor (multiple supervisor system) on studio assignments involving multiple fields of study.

2. Participate in an internship program at a Japanese domestic company, etc., approved by the supervisor for at least three months to acquire practical experience at the company.

3. Participate in an internship program at an overseas institution approved by the supervisor for at least three months to gain practical experience in a foreign country.

4. Participate in research closely related to industry, such as joint or commissioned research with companies, etc., and carry out a series of processes including design, production, testing, and report writing and presentation.

5. Conduct manufacturing with commercialization in mind and related practical research and development (including software).

6. Engage in activities related to the creation of intellectual property, including patent applications.

However, if you have difficulty in carrying out any of 1-6, please consult with your academic advisor and the teaching staff in charge of academic affairs.

(4) Ethical review

Immediately before any doctoral thesis defense (a thesis revised after the preliminary review of all departments in the Graduate School of Engineering Science), the academic advisor will check that it has proper copyright protection by using iThenticate. The application is then submitted to the thesis review committee. Before the final review, the committee examines the thesis while also checking that proper consideration has been given to copyright. The committee states the review results in the doctoral thesis review report.

9. Working students

The Graduate School of Engineering Science approves students who have applied for and been accepted into the Special Screening of Professionals (students who have been accepted by working adults) and who will continue to have a job after entering the program to an extended enrollment status.

The extended enrollment status refers to the completion of a course of study over a certain period of time beyond the standard duration for completing master's program (2 years) and doctoral program (3 years).

(Application procedure for the extended enrollment status must be completed prior to enrollment.)

The approved period of enrollment may be extended or shortened no more than once. Please consult with your academic advisor if you need to change your period of enrollment.

Please contact the Graduate School of Engineering Science Section for the procedure.

※1 : Only one of these courses can be taken. Consult with your academic advisor or the academic affairs officer regarding your intended enrollment.

※2 : Research guidance course.

Students specializing in aerospace engineering can take only one of the combinations of [Seminar in Mechanical Engineering A / Seminar in Mechanical Engineering B], [Exercise in Materials Engineering A / Exercise in Materials Engineering B], and [Exercise in Ocean and Space Engineering System A and Exercise in Ocean and Space Engineering System B].

※3: Consult with your academic advisor or the academic affairs officer regarding your intended enrollment.Only one of the nine courses can be taken.

※4: For students enrolled before AY 2020, these courses are classified as the "major courses".

※5: New courses from AY 2021. Students enrolled before AY2020 can also take these courses.

※6: New courses from AY 2022. Students enrolled before AY2021 can also take these courses.

※7: New courses from AY 2024. Students enrolled before AY2023 can also take these courses.

Courses marked with an asterisk (*) next to the Grade: Students who wish to complete their studies early may register for these courses irrespective of their year of registration after consulting their supervisors and members of the Academic Affairs and Library Committee.

Chemistry and Life Science

【major courses】

Classification	Schedule code	Course name	Instructor	Credits	Style of class	Grade	Academic tutorials	Language of instruction	Numbering	Year	Semester	Remarks

※1 : Only one of these courses can be taken. Consult with your academic advisor or the academic affairs officer regarding your intended enrollment.

※2 : Students must acquire ①【Exercise in Chemistry S / F , Exercise in Energy and Sustainable Chemistry BS / BF】 or
②【Seminar A in Chemistry Applications and Life Science, Seminar B in Chemistry Applications and Life Science, Seminar AS in Energy Chemistry, Seminar AF in Energy Chemistry】.
The students who takes【Exercise in Energy and Sustainable Chemistry BS】and【Exercise in Energy and Sustainable Chemistry BS】must acquire【Exercise for Effective Presentation in Chemistry (TED) 】.
It is not possible to take both of ① and ②.

※3: If you have already taken "Technology-Development & Society (NB20302) ", you cannnot take this course.

※4: If you have already taken "Simulation for Chemical Processes", you cannnot take this course.

※5: If you have already taken "Chemistry of Inter-element Linkage", you cannnot take this course.

※6: New course from AY 2024. Students enrolled before AY2023 can also take this course.

※7: For students enrolled before AY 2023, this course is classified as the "core course".

Courses marked with an asterisk (*) next to the Grade: Students who wish to complete their studies early may register for these courses irrespective of their year of registration after consulting their supervisors and members of the Academic Affairs and Library Committee.

Mathematics, Physics, Electrical Engineering and Computer Science

Notes
- Classification: 「e」indicates Engineering course group, 「s」indicates Science course group, 「i」indicates Information course group and 「p」indicates Professional course group.
- Schedule code: (S) indicates Spring semester, (F) indicates Fall semester and (Y) indicates Year-long-course.

VI-3 Master's program

<Pi-type Engineering Degree (PED) Program>

【core courses】

Classification	Schedule code	Course name	Instructor	Credits	Style of class	Grade	Language of instruction	Numbering	Year	Semester	Remarks
p	N000011	Multi-diciplinary Problem Based Learning in Graduate School of Engineering Science	ICHIGE KOICHI	2	Lectures	1･2	Japanese	ESa5002	Every	Spring	Required course of PED Program. (For students enrolled after AY2022)
p	(a) N00002A (b) N00002B (c) N00002C (d) N00002D	Presentation English	ANDO YOSHITAKA	2	Lectures	1･2	English	ESa5006	Every	Spring･Fall	Classification will be instructed separately as needed.
p	N000064	Innovation and New Business II	OTSUKA KAZUHIRO , et.al.	2	Exercise	1･2	Japanese	ESa4004	Every	Fall	
p	N000111	The Professional Ethics in EU＆US	KITAGAWA TATSUO	2	Lectures	1･2	English	ESa4002	Every	Spring	
p	N000121	Effective Business Planning in Global Companies	AOKI YUIKO	2	Lectures	1･2	Japanese	ESa4002	Every	Spring	Biweekly offered
p	N000131	Next Generation's Business Skills as a Global Standard	YAMAGUCHI HIROSHI	2	Lectures	1･2	Japanese	ESa4002	Every	Spring	Biweekly offered
p	N000141	Innovation and Challenges I	OTSUKA KAZUHIRO , et.al.	2	Lectures	1･2	Japanese	ESa4002	Every	1 st Term	
p	N000151	Innovation and Challenges II	OTSUKA KAZUHIRO , et.al.	2	Lectures	1･2	Japanese	ESa4002	Every	2 nd Term	
p	N000161	Standardization and Business	MANABU ETO	2	Lectures	1・2	Japanese	ESa4002	Every	Spring	
p	N000171	Technological subject in Kanagawa prefecture	TAMECHIKA EMI	2	Lectures	1・2	Japanese	ESa4002	Every	Fall	
p	N000184	Project Management	ONO TAKUYA	2	Lectures	1･2	Japanese	ESa4002	Every	Spring	Biweekly offered If you have already taken "Project Management Ⅰ", you cannnot take this course.
p	(S) N009811 (F) N009814	Oversea Internship for Science Engineering	OYAMA TOSHIYUKI	2	Exercise	1･2	Japanese	ESa9004	Every	Spring･Fall	
i	NA10011	Computational Fluid Engineering	MATSUI JUN	2	Lectures	1･2	English	ESb4554	Every	Spring	
e	NA10024	Turbulence Phenomena	NISHINO KOICHI	2	Lectures	1･2	English	ESb4554	Every	Fall	Can be regarded as making up the modules for students registered for Modules (1) to (6) for the Departments of Mechanical Engineering, Materials Science, and Ocean Engineering.
s	NA20014	Introduction to Materials for Electronics and Optoelectronics	MUKAI KOKI	2	Lectures	1･2	English	ESb4444	Every	Fall	Can be regarded as making up the modules for students registered for Modules (1) to (6) for the Departments of Mechanical Engineering, Materials Science, and Ocean Engineering.
e	NA20024	Introduction of multi-functional composites	NAKAO WATARU	2	Lectures	1･2	English	ESb4594	Every	Fall	
e	NA30014	Ship Motions in Waves	HIRAKAWA YOSHIAKI	2	Lectures	1･2	English	ESb4612	Every	Fall	
e	NA30024	Introduction to Ocean Resources and Energy Engineering	NISHI YOSHIKI	2	Lectures	1･2	English	ESb4612	Every	Fall	
i	NB10014	Advanced Statistical Mechanics	SAKOMURA MASARU	2	Lectures	1･2	English	ESf4521	Odd	Fall	
e	NB10031	Catalytic Chemistry	KUBOTA YOSHIHIRO	2	Lectures	1･2	English	ESf4603	Odd	Fall	
e	NB10044	Design of Polymers and Polymer Systems	OYAMA TOSHIYUKI	2	Lectures	1･2	English	ESf4533	Even	Spring	
s	NB10064	Microbial Biotechnology	KIKUCHI YOSHIMI , et.al.	2	Lectures	1･2	Japanese	ESf4712	Odd	Fall	
s	NB10074	Advanced Instrumental Analysis	TANIMURA MAKOTO	2	Lectures	1･2	Japanese	ESf4534	Every	Fall	
s	NB10254	Solid State Chemistry	YABUUCHI NAOAKI	2	Lectures	1･2	English	ESh4523	Even	Fall	
i	NB20011	Process Monitoring	OKAZAKI SHINJI	2	Lectures	1･2	English	ESf5565	Every	Spring	
e	NB20031	Advanced Transport Phenomena	AIHARA MASAHIKO	2	Lectures	1･2	English	ESf5601	Every	Spring	
e	NB20043	Cutting Edge of Fuel Cell Technology	MITSUSHIMA SHIGENORI , et.al.	2	Lectures	1･2	English	ESf5537	Every	3 rd Term	
e	NB20324	Advanced Reaction Engineering	TAKAGAKI ATSUSHI	2	Lectures	1･2	English	ESf5602	Every	Fall	New course from AY2024. Students enrolled before AY2023 can also take this course.

Classification	Schedule code	Course name	Instructor	Credits	Style of class	Grade	Language of instruction	Numbering	Year	Semester	Remarks
s	NC10014	Mathematical Sciences: Algebra	KAJIWARA TAKESHI	2	Lectures	1･2	English	ESj4471	Even	Fall	specified for specialization in Mathematical Sciences Can be regarded as making up the modules for students registered for Modules (1) to (6) for the Departments of Mechanical Engineering, Materials
s	NC10021	Mathematical Sciences: Geometry	HONDA ATSUFUMI	2	Lectures	1･2	English	ESj4472	Odd	Spring	specified for specialization in Mathematical Sciences
s	NC10031	Mathematical Sciences: Analysis	UEKI SEIICHIRO	2	Lectures	1･2	English	ESj4473	Even	Spring	specified for specialization in Mathematical Sciences
i	NC10044	Mathematical Sciences: Probability and Statistics	TAKEI MASATO	2	Lectures	1･2	English	ESj4475	Every	Spring	In charge of Even year : TAKEI MASATO In charge of Odd year :KONNO NORIO Even year:Fall Semester
s	NC10051	Mathematical Sciences: Data Sciences	KUROKI MANABU	2	Lectures	1･2	English	ESj4475	Every	Spring	specified for specialization in Mathematical Sciences
s	NC20021	Nanophysics and Advanced Materials	ICHIYANAGI YUKO , et.al.	2	Lectures	1･2	English	ESj4432	Every	Spring	
s	NC20031	Magneto-Science	UEHARA MASATOMO	2	Lectures	1･2	English	ESj4493	Odd	Spring	
s	NC20044	Low temperature physics	SHIMAZU YOSHIHIRO	2	Lectures	1･2	English	ESj4492	Odd	Fall	
s	NC20051	Astroparticle Physics	NAKAMURA SHOGO	2	Lectures	1･2	English	ESj4491	Odd	Spring	
e	NC30014	Energy System	FUJII YASUMASA , et.al.	2	Lectures	1･2	Japanese	ESj4616	Even	Spring	
i	NC30024	Signal Theory	SHOUKI HIROKI	2	Lectures	1･2	Japanese	ESj4564	Every	Fall	
e	NC30041	VLSI System Design	YOSHIKAWA NOBUYUKI	2	Lectures	1･2	English	ESj4563	Every	Spring	
i	NC30064	Intelligent Systems	HAMAGAMI TOMOKI	2	Lectures	1･2	English	ESj4124	Every	Fall	
e	NC30071	Material Integration	MATSUKI TAKEO	2	Lectures	1･2	Japanese	ESj4562	Every	Spring	
e	NC30444	Future technologies and perspective based on advanced IT and electronics	YOSHIKAWA NOBUYUKI	2	Lectures	1･2	Japanese	ESj4563	Every	Fall	If you have already taken "A Course for Advanced Electronics Products and Their Architecture", you cannnot take this course.

【specialized module】

Mechanical Engineering, Materials Science, and Ocean Engineering

Studio courses

Module Title	Module Manager's Name	Schedule code	Studio courses name	Instructor	Credits	Style of class	Grade	Language of instruction	Numbering	Year	Semester	Remarks
(1) Design of Processing Systems	AKINIWA YOSHIAKI	(S) NA15101 (F) NA15104	Design of Processing Systems A	AKINIWA YOSHIAKI , et.al.	4	Exercise	1･2	Japanese	ESe5018	Every	Spring･Fall	
		(S) NA15201 (F) NA15204	Design of Processing Systems B	AKINIWA YOSHIAKI , et.al.	4	Exercise	1･2	Japanese	ESe5018	Every	Spring･Fall	
(2) Manufacturing of Processing Systems	AKINIWA YOSHIAKI	(S) NA15301 (F) NA15304	Manufacturing of Processing Systems A	AKINIWA YOSHIAKI , et.al.	4	Exercise	1･2	Japanese	ESe5018	Every	Spring･Fall

Ⅶ Procedures Involving Student Affairs

Ⅶ-1 Leave Of Absence, Re-enrollement, Withdrawal, Application to Another University

1. Leave of Absence

1) If you wish to apply for a leave of absence due to an illness or for other reasons within the academic year, submit the application for a leave of absence (to be co-signed by a parent or another contact person) and obtain approval from the Principal in accordance to the criteria for the approval of leave of absence from YNU. **The application must be submitted at least 10 days before the intended leave begins.** (Contact the Graduate School of Engineering Science Section to receive the necessary application form.)
2) You may be required to take a leave of absence if your continued study is deemed undesirable due to an illness. (Article 50, University General Regulations)
3) If a leave of absence was approved but the cause for the leave is not resolved even after the approved period has expired, the student may apply for an extension. (Apply for the extension before the leave of absence expires by contacting the Graduate School of Engineering Science Section and obtaining the necessary application form.)
4) The period of leave of absence is not counted in the period of enrollment.
5) The period of leave cannot exceed two years for a master's program and three years for a doctoral program.

* Contact the Graduate School of Engineering Science Section as soon as you have decided to apply for a leave to discuss matters including the procedure related to tuition fee.

(Reference: Article 15, Regulations on Tuition Waiver and Postponement of Collection at Yokohama National University
http://somu-somu.ynu.ac.jp/gakugai/kisoku/act/frame/frame110000168.htm)

(Reference) Criteria for the approval of leave of absence from YNU

Article 1 Pursuant to Paragraph 4, Article 50 of the General Regulations of Yokohama National University (hereinafter "University General Regulations"), a leave of absence is approved if a person requires continued absence for at least three months for any of the reasons mentioned in the following items:

(1) Sickness or injury of the applicant (a medical certificate is required)
(2) Childbirth by the applicant or child-rearing of the applicant's child (including a legally adopted child) until the child reaches the age of three (a medical certificate for the child delivery, etc., is required)
(3) Financial difficulties (a written justification and documents to prove the fact is required)
(4) The applicant needs to temporarily help the family business due to the death of the head of the household or the like (a written justification and documents to prove the fact is required)
(5) The applicant needs to take care of a sick family member (a written justification and medical certificate to prove the sickness, or a written justification and a certificate to prove the need for long-term care are required)
(6) Work obligation (a certificate from the employer is required)
(7) Acknowledged educational benefit of studying at a foreign university, college, or graduate school (a document to prove the intended study at the host university, college, or graduate school, and a document describing the intended study are required)
(8) Other unavoidable reasons acknowledged by the faculty council (a document to prove the reason is required)

Article 2 The reason stipulated in Paragraph 2, Article 51 of the University General Regulation and in Paragraph 3, Article 22 of the YNU Graduate School General Regulations shall be limited to item 2 in the previous paragraph.

2. Re-enrollment

1) If the reason for a leave of absence is resolved during the approved period of leave, re-enrollment can be made by obtaining the approval of the Principal. (Contact the Graduate School of Engineering Science Section to obtain the necessary application form.)
2) Once re-enrolled, the student must pay tuition for the period of study as calculated on a monthly basis.

3. Withdrawal

1) If you wish to withdraw from the course, submit an application (to be co-signed by a parent or a contact person) along with a written justification and obtain approval from the Principal. The application must be submitted at least 10 days before the intended date of withdrawal. (Contact the Graduate School of Engineering Science Section to obtain the necessary application form.)
2) You still have to pay tuition for the semester even if you have withdrawn from the course.
3) The student ID must be returned when you withdraw.

4. Application to Another University

1) A student may submit an application to another university and take the entrance examination by obtaining the approval of the Dean of the Graduate School of Engineering Science. (Contact the Graduate School of Engineering Science Section to obtain the necessary application form.)
2) If you successfully pass the entrance examination to another university, immediately follow the steps to withdraw from our university.

Ⅶ-2 Various Notification

1. Procedure for Going Abroad

When students go to abroad ,whatever the purpose is , please submit ' Overseas Travel Notification' to YNU in advance. The template can be downloaded from the website of the Global Promotion Division (https://global.ynu.ac.jp/en/support/safety/). Also follow the necessary procedure by referring to the same website. (http://www.ynu.ac.jp/english/international/voyage_info/security.html)

Make sure to start preparing well in advance as some steps may take time.

2. Notifications

Notification	Place of submission	Timing/Deadline	Remarks
Change of the student's address	Educational Affairs Division, Student Affairs and International Relations Department (second floor of the International Student Center)	After any change	
Change of domicile			
Change of surname or given name			Attach a copy of the family register
Change of address of parents, etc.			
Overtime research	Register through the Electronic Management System for Overtime Research (https://www.rms.ynu.ac.jp/)		Overtime research notification can be submitted instead of an application for borrowing a facility if research needs to be continued after 21:00, overnight, or during holidays.
Internship report	Graduate School of Engineering Science Section (Submit it as an attachment to an email.)	After the internship is over	The form is available on the website of the Graduate School of Engineering Science (https://www.fse.ynu.ac.jp/english/education/index.html).

Ⅶ-3 Issuance of Certificates

1. Issuance of Certificate while in YNU

(1) Certificates of enrollment (Japanese/English), transcripts (Japanese/English), certificates of expected completion (Japanese/English), student discount certificates for public transportation, and health certificates can be issued by automated certificate-issuing machines.

(2) Other certificates cannot be issued immediately. Check the necessary application form and place of submission, then go to the specified office to fill in and file the necessary application.

2. Issuance of Certificates after the Program Completion

Go to the YNU website(https://www.ynu.ac.jp/campaus/procedure/certificate.html) to learn how to apply for certificates.

If you have any questions, contact the Graduate School of Engineering Science Section by email (ses.daigakuin-eng@ynu.ac.jp)

Ⅶ-4 Collection of Tuition and Delinquency

Tuition fees will be collected in accordance with the "Regulations on the Collection of Tuition Fees by Yokohama National University and Reminders to Delinquents" (http://somu-somu.ynu.ac.jp/gakugai/kisoku/act/frame/frame110000184.htm). Pay attention to the date of automatic withdrawal, etc.

Ⅷ　Activity Support System by Plurality of Teachers

Ⅷ－１　System of Support Teacher

Graduate School of Engineering Science sets each student a support teacher in addition to academic advisor to consult about your research activity or campus life at the school entrance. You can consult with the support teacher while your academic advisor is absent. If you would like to know your support teacher, please ask your academic advisor or academic affairs officer.
