YNU > About YNU > Campus Life > Annual Schedule

Refer to (<http://www.ynu.ac.jp/english/campus/schedule/index.html>).

I The Educational Goals of the Graduate School of Engineering Science

Both science and engineering have a mission to directly contribute to the welfare and sustainable development of human society. Our graduate school believes that engineers and researchers play crucial roles in pioneering new industries and science fields that lead toward a brighter future while accurately assessing various social needs and addressing environmental and other global challenges. With the goal of serving as an international hub of practical science, the school aims to foster globally competitive professionals that are well versed in both science and engineering with sound ethics and enterprising spirits to learn beyond their areas of expertise.

In our master's programs, students build their foundation in a wide range of science fields, in addition to acquiring advanced knowledge and skills in the courses designed for their own areas of expertise. They also engage in research to develop original technologies and acquire new knowledge. In this manner, they are expected to grow into highly advanced and professional engineers and researchers who can identify their own research agenda and make comprehensive judgments flexibly to respond to unknown problems based on their broad perspectives.

In our doctoral programs, students engage in advanced scientific and technical research regarding the challenges that they have identified. They are expected to grow into pioneering leaders in science and industry with abilities to make comprehensive judgments based on their broad perspectives and communicate their findings throughout our society. In other words, our graduate school produces creative and highly specialized leaders who will drive further innovations.

II Education Programs and Curriculum at the Graduate School of Engineering Science

II-1 Education Programs at the Graduate School of Engineering Science

The Graduate School of Engineering Science offers four education programs (Figure 1).

Firstly, the **T-type Engineering Degree (TED)** Program overcomes the shortcomings of excessively specialized and conventional I-shaped engineering education by offering broader perspectives. Our education model has undergone reform and moved away from parochial specialization towards a more integrated engineering education that combines a high degree of specialization and broad perspectives. The vertical line of the letter T from the TED Program represents the students' in-depth research in their area of expertise at their assigned laboratories. Students must write a master's or doctoral thesis in this program, which aims to produce highly advanced engineers and researchers. Once they have completed the program, students are awarded a master's or doctoral degree in engineering.

Secondly, the **Pi-type Engineering Degree (PED)** Program is a unique education method applied in Japan for the first time. The program is designed to produce practical engineers and researchers who can turn innovations resulting from the advancement of sciences and technologies into advanced manufacturing.

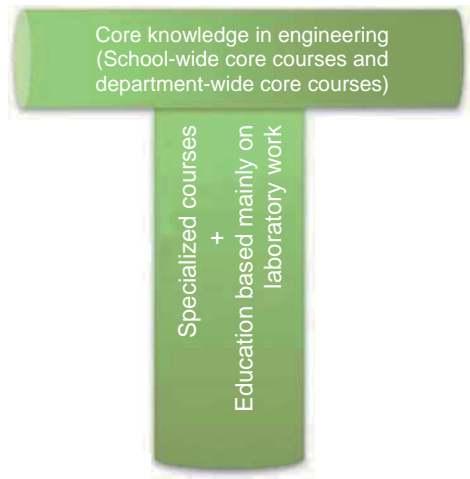

As the symbol of Pi (Π) from the PED Program represents, basic knowledge in engineering (horizontal line of Π) is combined with more than one module of specialization (two vertical lines of Π). Such a unique Yokohama-style graduate education system produces practical engineers and researchers who can respond to challenges faced by today's diversified and highly advanced industrial society. In our master's programs, students take coursework consisting of laboratory courses, exercises, and training (including long-term internship) instead of writing a master's thesis or being assigned to specific laboratories. Once they have completed the program, students are awarded a master's degree in engineering. In the doctoral programs, students are required to write a doctoral thesis, which is reviewed by keeping in mind that students are expected to become practical researchers who will lead advanced manufacturing. Once they have completed the program, students are awarded a doctoral degree in engineering.

Thirdly, YNU's original Professional Science Degree (PSD) Program enables students to acquire various necessary skills in our industrial society through workshops and internships organized to utilize the strengths of our universities while referring to the graduate education programs in science as advocated by the National Professional Science Master's Association (NPSMA). Based on their advanced knowledge in basic science, students will pursue the truth in natural science and contribute to the development of science-oriented industries in anticipation of the technological innovation for the next 10 to 20 years. They are also expected to develop knowledge in both science and engineering, as well as adequate language and other skills for working globally. In the program, workshops and internship are organized for science students of physics and chemistry to help them acquire the skills that are needed by companies. Once they have completed the program, students are awarded a master's or doctoral degree in science.

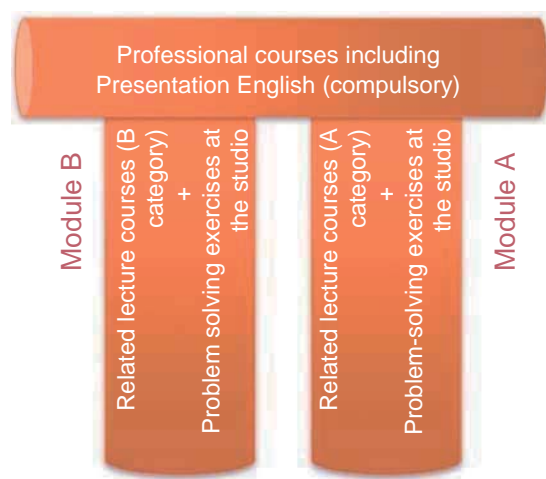

Lastly, the Science Degree Program produces deep thinkers with good judgment and advanced expertise in modern mathematics who not only pursue the truth in mathematical science, but also contribute to the development of science-oriented industries in anticipation of the technological innovation for the next 10 to 20 years. The education program is designed to apply advanced mathematical science, which is a constant and important driving force of innovation in our rapidly evolving information society. Students of mathematics are awarded a master's or doctoral degree in science.

Successful completion of the program is judged mainly based on their master's or doctoral theses.

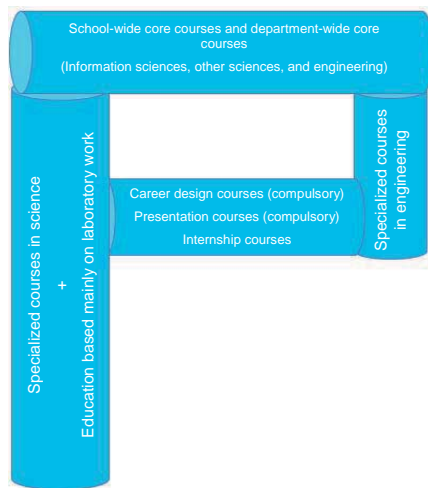

T-type Engineering Degree (TED) Program

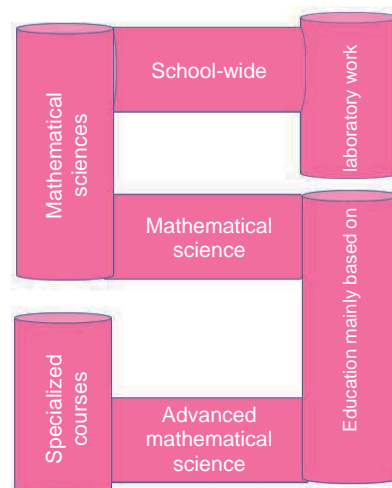

Pi-type Engineering Degree (PED) Program

Professional Science Degree (PSD) Program

Science Degree Program

(Figure 1) Structures of TED, PED, PSD, and Science Degree Programs at the Graduate School of Engineering Science

II-2 Curriculum at the Graduate School of Engineering Science (Departments and Specializations)

The departments of the Graduate Schools of Engineering Science are shown below along with the specializations covered.

Master's programs

Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering
	Materials Science Frontier
	Systems Design for Ocean-Space
	Aerospace Engineering
Chemistry and Life Science	Chemistry
	Applied Chemistry
	Chemistry Applications and Life Science
	Energy and Sustainable Chemistry
Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences
	Physics
	Applied Physics
	Information Systems
	Electrical and Computer Engineering

Doctoral programs

Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering
	Materials Science Frontier
	Systems Design for Ocean-Space
Chemistry and Life Science	Chemistry
	Applied Chemistry
	Chemistry Applications and Life Science
Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences
	Physics
	Applied Physics
	Information Systems
	Electrical and Computer Engineering

II-3 List of Education Programs by Department and Their Descriptions

Programs offered by each department of the Graduate School of Engineering Science are described below.

The parts marked by asterisks apply only to master's programs.

Program	Awarded degree	Description	Mechanical Engineering, Materials Science, and Ocean Engineering				Chemistry and Life Science				Mathematics, Physics, Electrical Engineering and Computer Science				
			Mechanical Engineering	Materials Science Frontier	Systems Design for Ocean-Space	Aerospace Engineering	Chemistry	Applied Chemistry	Chemistry Applications and Life Science	Energy and Sustainable Chemistry	Mathematical Sciences	Physics	Applied Physics	Information Systems	Electrical and Computer Engineering
TED	Engineering	(T-type Engineering Degree Program) In-depth education in the area of specialization is combined with education to lay the foundation in a broad range of areas, including other fields.	○	○	○	○*		○	○	○*			○	○	○
PED	Engineering	(Pi-type Engineering Degree Program) Practical education is offered in a combination of modules, each of which systematically integrates a studio (laboratory courses, exercises, and training related directly to manufacturing and conducted in a small team) with related lecture courses. In master's programs, studio deliverables are mainly used to prepare portfolios in place of a master's thesis.	○	○	○	○*			○				○	○	○
PSD	Science	(Science education with an eye to future engineering: Professional Science Degree Program) The programs aim to produce professionals with knowledge in basic science to drive technological innovation and science-oriented industries, as well as skills to work globally.					○					○			
Science	Science	(Science Degree Program) The programs produce professionals who can apply their knowledge in mathematical science and contribute to the development of science-oriented industries in anticipation of technological innovation.									○				

III Common Rules in the Graduate School

III-1 Enrollment Procedure

1. Procedures for Course Registration

Students cannot take courses without first enrolling through the Educational Affairs Information System. They will not receive any grades (credits) for such courses either, even if they have passed the examinations.

Connect to the YNU's Educational Affairs Information System from your web browser and enter the time schedule code of the course that you want to enroll in.

Go to the top page of the YNU website and login to the Educational Affairs Information System by choosing YNU > Campus Life > Y's Net for Students > Educational Affairs Information System
(http://www.ynu.ac.jp/campus/student_only/affairs_system.html).

Off-campus enrollment is also possible by logging into the Educational Affairs Information System via the Matrix Authentication System at the Information Technology Service Center (<https://matrixauthsv.ynu.ac.jp/portal/>).

(1) Enrollment period

Spring semester:	April 13 (Friday)–April 20 (Friday)	9:00–21:00 on weekdays
Fall semester:	October 12 (Friday)–October 19 (Friday)	9:00–21:00 on weekdays

* Submit your Course Registration Plan to the Graduate School of Engineering Science Section by the following date. Make sure to keep one copy for yourself.

Submission deadline	Spring semester: April 23 (Monday)	Fall semester: October 22 (Monday)
---------------------	------------------------------------	------------------------------------

(2) Enrollment confirmation and modification period

Spring semester:	May 7 (Monday)–May 9 (Wednesday)	9:00–21:00 on weekdays
Fall semester:	October 24 (Wednesday)–October 26 (Friday)	9:00–21:00 on weekdays

* Make sure that your courses have been registered according to your enrollment plan. Any mistakes in registration or errors with the courses should be fixed by adding or deleting courses in the Educational Affairs Information System.

* No correction or addition can be made if you have failed to register any course during the enrollment period.

(3) Enrollment cancellation period

Spring semester:	May 14 (Monday)–May 18 (Friday)	9:00–21:00 on weekdays
Fall semester:	November 5 (Monday)–November 9 (Friday)	9:00–21:00 on weekdays

* You may cancel (delete) your enrollment for a particular course in the Educational Affairs Information System if the course turns out to be completely different from what you expected or for any other reasons. If you abandon a course halfway without cancelling the enrollment, you will receive "F (Fail)" as your grade for that course. You can only cancel courses during the enrollment cancellation period.

* If you modify or cancel your enrollment after the enrollment registration period, make sure to submit your revised Course Registration Plan after confirming with your academic advisor. The deadline is May 21 (Monday) for the spring semester and November 12 (Monday) for the fall semester.

2. General Note Regarding Enrollment

- 1) Courses must be registered by the specified deadline for both spring and fall semesters. In principle, the registered courses in the enrollment plan that you have submitted cannot be changed.
- 2) You may not take courses that you have not enrolled in.
- 3) You may not enroll in two or more courses in the same time slot.
- 4) Full-year courses (offered in both spring and fall semesters) cannot be taken only in the spring or fall semester.
- 5) After receiving credits from a course, you cannot take the course again.

3. Course Overview

(1) Outline of each course (syllabus)

- 1) The basic information on each course is electronically published, along with the course objective, course plan, learning activities beyond class hours, study goals and targets, grading method, and the way the class is conducted. Starting from courses offered in academic year 2010, syllabuses can be searched by college, school, or teacher, or using any keyword. Students can browse syllabuses on the Educational Affairs Information System, which contains different items than syllabuses that are available to the public.

(2) The time schedule at the Graduate School of Engineering Science

- 1) The time schedule at the Graduate School of Engineering Science is not distributed in the form of a brochure.
- 2) Browse the schedule on the website of the Graduate School of Engineering Science (<http://www.fse.ynu.ac.jp/education/index.html>). Any date and classroom name not indicated for a course on the time schedule will be announced on the bulletin board, etc., as soon as they are finalized.

4. Course Numbering

The numbering code is a number used to indicate the specialization and level of difficulty for each course. (For more details, go to the top page of the YNU website > Education and Research > Educational Activities > Graduate Education Policy: YNU Initiative.)

* Numbering rule

Digit	Indication		Alphanumeric notation
First and second digits	School	Graduate School of Engineering Science	ES*****
Third digit	Department and course (school-wide, department-wide, or specialized)	School-wide	ESa****
		Mechanical Engineering, Materials Science, and Ocean Engineering	ESb****—ESe****
		Chemistry and Life Science	ESf****—ESi****
		Mathematics, Physics, Electrical Engineering and Computer Science	ESj****—ESm****
Fourth digit	Learning level	Level code of course	ES*4****—ES*6****
			ES*9***
Fifth to seventh digits	Numbering according to the specialization of lecture courses		ES**0**
	Numbering of non-lecture courses according to the specialization and type of course * The fifth digit is fixed at "0," the sixth digit indicates the specialization, and the seventh digit indicates the type of course		

5. Standard Class Hours per Course

Standard class hours per credit for a course are determined as follows:

- 1) For each lecture or exercise course, one credit is usually awarded for every 15-class hours, but some exercises award one credit for every 30-class hours.
- 2) For experiments, laboratory courses, and practices, one credit is usually awarded for every 30-class hours. If deemed necessary for educational purposes, some experiments and laboratory work award one credit for every 45-class hours.
- 3) If one course combines lectures, exercises, experiments, laboratory work, or practices, the number of awarded credits is calculated based on the number of class hours according to the combination of learning activities.

6. Examinations

- 1) The examination periods are defined in the academic calendar (*).
- 2) As a rule, the examination for each course is conducted on the day of the week and hour specified in the time schedule.
- 3) In general, no class will be conducted except for examinations during the examination period, with the exception of some classes.
- 4) Please obey the following rules when you are taking an examination:
 - During an examination, display your student ID on your desk.
 - Disciplinary action will be taken for any misconducts during an examination pursuant to Article 24 of the Graduate School General Regulation.

* The academic calendar of YNU is organized in two semesters and six terms. Courses are offered either by semester or by term. The Graduate School of Engineering Science conducts courses in two semesters—spring and fall.

7. Credit Recognition and Grades

- 1) Grades are determined based on scores from examinations and written assignments.
- 2) As a general rule, no additional or make-up examinations will be held.
- 3) Check your grades in the Educational Affairs Information System. Grades from the spring semester are available from the first day of the fall semester in early October, while grades from the fall semester are available from the first day of the spring semester in early April of the next academic year.
- 4) The completion of a program requires a GPA (Grade Point Average) of 2.0. In order to calculate the GPA, a grade point is assigned to each grade. The grade point of each course taken by a student is multiplied with the number of credits assigned for that course. The student's GPA is the sum of all the courses taken divided by the total number of credits for the enrolled courses.
- 5) The number of credits from cancelled courses is deducted from the number of credits from registered courses. The grade for any abandoned course after the specified cancellation deadline will be "F (Fail)."
- 6) You can retake a course if you have received a grade of "F (Fail)." If the course is successfully completed, the grade from the retaken course is counted in the GPA, although the number of credits from that course will not be added to the denominator for calculating the GPA.

Grade	Grade Point	Score	Pass/Fail
Excellent *	4.5	100–90	Pass
Very good *	4	89–80	
Good	3	79–70	
Fair	2	69–60	
Fail	0	59–0	Fail

$$\text{GPA} = \frac{\sum (\text{GP} \times \text{Number of credits})}{\text{Total number of credits from registered courses}}$$

* Grading criteria

The grade of "Excellent" with scores of 90 or more is awarded for surpassing the learning goals.

The grade of "Very Good" with scores between 80 and 89 is awarded for achieving the learning goals.

8. Enrollment of College-level Courses

Master's programs

In the Graduate School of Engineering Science, master's students in TED, PSD, and Science Programs may substitute up to 10 credits from specialized courses with credits from college-level courses according to the instruction or advice from their advisors. (The PED Program allows students to take college-level courses, but the credits cannot be counted towards the completion of the program.)

Enrollment is possible only with the following specified courses. The number of assigned credits is as indicated for each course.

Note that the **specialization in mechanical engineering** for both TED and PED Programs does not permit the enrollment of college-level courses.

Department	Specified Course
Mechanical Engineering, Materials Science, and Ocean Engineering	Internal Combustion Engines, Microstructure and metallurgy, X-ray Diffraction in Materials Science , Physical Metallurgy and Exercise I, Physical Metallurgy and Exercise II, Strength of Crystalline Solids , Strength and Fracture of Materials , Electronic Properties of Solids , Mathematical Theory of Plasticity , Metal Forming, Solidification Theory, Computational Materials Science, and Environment Conscious Materials
Chemistry and Life Science	Physical Organic Chemistry, Introduction to Solid State Physics, Quantum Chemistry, Coordination Chemistry, Structural Biochemistry, Organometallic Chemistry, Design of Organic Synthesis , Structural Chemistry, Cosmogenochemistry , Polymer Chemistry 1 , Synthetic Organic Chemistry , Electrochemistry B , Inorganic Solid State Chemistry, Polymer Chemistry 2, Inorganic Material Chemistry , Chemistry of Organic Functional Materials, Polymer Chemistry, Fundamental Catalytic Chemistry, Applied Electrochemistry, Analytical Chemistry 2B, Analytical Chemistry 3, Design and Drawing of Machinery and Apparatus, Introduction to Industrial Chemistry, Thermodynamics for energy conversion , Engineering Materials, Process System Engineering, Strength and Fracture of Materials, Safety Engineering for Energetic Materials , Environmental Engineering 2, Environmental and Energy System Theory, Separation science and engineering, Fluid engineering, Risk engineering , Environmental Engineering 1, Chemical Reaction Engineering, Bioengineering 1, and Bioengineering 2
Mathematics, Physics, Electrical Engineering and Computer Science	Advanced Electrical and Computer Engineering, Electrical Energy Engineering, Electrical Energy System Engineering , Materials Science and Technology for Electricity, Power Electronics , Basic Control Theory, Digital Control , System Engineering, Nano-Electronics, Semiconductor Engineering , Electronic Devices , VLSI Systems , Radio Frequency Circuit Theory , Analog Circuit Design , Optical Engineering, Optoelectronics, Electromagnetic Wave Engineering, Communication System, Digital Signal Processing, Digital Communications , Robotics and Mechatronics, Practical Software Engineering, Quantum Statistical Mechanics, Quantum Mechanics 3, Electromagnetism 3, Solid State Physics 1, Solid State Physics 2, High Energy Physics, Advanced Solid State Physics, Computer Physics , Galois Theory and Number Theory , Manifold Theory , Functional analysis , Probability Theory with Applications , Stochastic Models, and Engineering Mathematics Statistics

Doctoral programs

Students of doctoral programs may not take college-level courses except for courses of foreign languages (introductory level) and Japanese language (note that credits from these courses are not counted towards the completion of programs).

9. List of Items to be Submitted

The following lists items to be submitted from admission until graduation, along with the submission period and place of submission.

Master's programs

Submission period	Required document	Target programs	Place of submission	Remarks
After the orientation	Enrollment adjustment sheet	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Adjustment sheet for practical courses with enrollment limits
Enrollment period for the spring semester in the first year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be signed and affixed with a seal by the academic advisor.
Enrollment period for the fall semester in the first year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be signed and affixed with a seal by the academic advisor.
After the fall semester in the first year	Studio deliverables	PED	Affiliated laboratory	Deliverables from studio courses taken in one year
Enrollment period for the spring semester in the second year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be signed and affixed with a seal by the academic advisor.
Enrollment period for the fall semester in the second year	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be signed and affixed with a seal by the academic advisor.
After the fall semester in the second year	Studio deliverables	PED	Affiliated laboratory	Deliverables from studio courses taken in one year
Deadline specified by each specialization	Master's thesis	TED, PSD, SD	According to the instruction given in each specialization	
	Portfolio	PED		After the thesis defense, upload the latest portfolio to the Learning Management System.

Doctoral programs

Submission period	Required document	Target programs	Place of submission	Remarks
Enrollment period for the spring/fall semester	Course Registration Plan	TED, PSD, SD, PED	Graduate School of Engineering Science Section	The plan must be signed and affixed with a seal by the academic advisor.
After the fall semester	Studio deliverables	PED	Affiliated laboratory	Deliverables from studio courses taken in one year
Year of completion	Doctoral thesis	TED, PSD, SD, PED	Graduate School of Engineering Science Section	Detailed instructions from the Graduate School of Engineering Science will be provided by the academic advisor.

III-2 Foreign Language Courses

1. Enrollment of Japanese Language Courses

- (1) Japanese language courses are intended for international students.
- (2) International students are requested to pay attention to announcements from the International Student Center.
- (3) International students must take placement tests (so that they can be placed in suitable classes).
- (4) Check the schedule of placement tests in News & Information on the top page of the website of the International Student Center (<http://www.isc.ynu.ac.jp>).
- (5) After placement, enroll in the Japanese language courses offered by the International Student Center. (If credits are needed, take Japanese language courses for international exchange. If not, take university-wide Japanese language courses.)

2. Enrollment of Introductory Foreign Language Courses (University-wide)

Students who wish to enroll in foreign language courses should consult with the Graduate School of Engineering Science Section in advance.

Note that undergraduate students are given priorities in the enrollment of introductory foreign language courses. Anyone interested will be informed of available courses after checking the enrollment by undergraduate students. Enroll in available courses during the period for enrollment and modification.

3. Credits from Foreign Language Courses

Credits from foreign language courses are not counted as credits needed to complete a study program. However, a student who has taken courses in one foreign language (non-native) during their master's or doctoral program may be exempted from language examination during their doctoral thesis defense.

The abovementioned language examination is conducted for international students in a non-native language (including Japanese).

III-3 Minor Programs

Minor programs are offered to meet the diverse learning needs of students and to motivate them by acknowledging the outcome of their systematic learning in specific areas through specific assignments. Students who satisfy the requirements to complete the program are awarded certificates, and the completion is stated in their transcripts. Requirements for enrollment vary from one program to another. For more details, go to the top page of the YNU website > Education and Research > YNU Education > Minor Programs (http://www.ynu.ac.jp/education/ynu_education/vice_special.html).

III-4 Important Notes for International Students

- 1) Make sure to participate in the orientation for incoming international students organized at the beginning of each semester (April and October).
- 2) Please try to learn Japanese as most courses at the Graduate School of Engineering Science are offered in Japanese, although some courses are offered in English. There are also other regular courses related to Japanese language that are offered at YNU. For more information, please refer to the website of the International Student Center (<http://www.isc.ynu.ac.jp/study/>).
- 3) Some departments offer lectures designed for international students. Make the most of this opportunity by following the instruction and advice from your advisor.
- 4) Lectures offered at a college can be taken if the intended research requires the relevant basic knowledge provided in those lectures. Take those lectures as necessary according to the instruction and advice from your advisor. (Refer to "Enrollment to college-level courses" on page 12.)
- 5) Join an appropriate insurance as you may experience illness, accident, or unexpected trouble during your study period.
- 6) Matters related to scholarships, dormitories, and the welfare of international students are handled by the Student Support Division and the International Affairs Division of the Student Affairs and International Relations Department (both located on the second floor of the International Student Center). If necessary, consult these divisions or the Graduate School of Engineering Science Section.
- 7) A tutor is assigned to each international student during the first year of their studies. Make the most of the assistance from the tutor by consulting all matters related to your study program.

III-5 Procedures Involving Student Affairs

1. Leave of Absence

- 1) If you wish to apply for a leave of absence due to an illness or for other reasons within the academic year, submit the application for a leave of absence (to be co-signed by a parent or another contact person) and obtain approval from the Principal in accordance to the criteria for the approval of leave of absence from YNU. The application must be submitted at least 10 days before the intended leave begins. (Contact the Graduate School of Engineering Science Section to receive the necessary application form.)
 - 2) You may be required to take a leave of absence if your continued study is deemed undesirable due to an illness. (Article 50, University General Regulations)
 - 3) If a leave of absence was approved but the cause for the leave is not resolved even after the approved period has expired, the student may apply for an extension. (Apply for the extension before the leave of absence expires by contacting the Graduate School of Engineering Science Section and obtaining the necessary application form.)
 - 4) The period of leave of absence is not counted in the period of enrollment.
 - 5) The period of leave cannot exceed two years for a master's program and three years for a doctoral program.
- * Contact the Graduate School of Engineering Science Section as soon as you have decided to apply for a leave to discuss matters including the procedure related to tuition fee.

(Reference: Article 15, Regulations on Tuition Waiver and Postponement of Collection at Yokohama National University
<http://somu-somu.ynu.ac.jp/gakugai/kisoku/act/frame/frame110000168.htm>)

(Reference) Criteria for the approval of leave of absence from YNU

Article 1 Pursuant to Paragraph 4, Article 50 of the General Regulations of Yokohama National University (hereinafter "University General Regulations"), a leave of absence is approved if a person requires continued absence for at least three months for any of the reasons mentioned in the following items:

- (1) Sickness or injury of the applicant (a medical certificate is required)
- (2) Childbirth by the applicant or child-rearing of the applicant's child (including a legally adopted child) until the child reaches the age of three (a medical certificate for the child delivery, etc., is required)
- (3) Financial difficulties (a written justification and documents to prove the fact is required)
- (4) The applicant needs to temporarily help the family business due to the death of the head of the household or the like (a written justification and documents to prove the fact is required)
- (5) The applicant needs to take care of a sick family member (a written justification and medical certificate to prove the sickness, or a written justification and a certificate to prove the need for long-term care are required)
- (6) Work obligation (a certificate from the employer is required)
- (7) Acknowledged educational benefit of studying at a foreign university, college, or graduate school (a document to prove the intended study at the host university, college, or graduate school, and a document describing the intended study are required)
- (8) Other unavoidable reasons acknowledged by the faculty council (a document to prove the reason is required)

Article 2 The reason stipulated in Paragraph 2, Article 51 of the University General Regulation and in Paragraph 3, Article 22 of the YNU Graduate School General Regulations shall be limited to item 2 in the previous paragraph.

2. Re-enrollment

- 1) If the reason for a leave of absence is resolved during the approved period of leave, re-enrollment can be made by obtaining the approval of the Principal. (Contact the Graduate School of Engineering Science Section to obtain the necessary application form.)
- 2) Once re-enrolled, the student must pay tuition for the period of study as calculated on a monthly basis.

3. Withdrawal

- 1) If you wish to withdraw from the course, submit an application (to be co-signed by a parent or a contact person) along with a written justification and obtain approval from the Principal. **The application must be submitted at least 10 days before the intended date of withdrawal.** (Contact the Graduate School of Engineering Science Section to obtain the necessary application form.)
- 2) You still have to pay tuition for the semester even if you have withdrawn from the course.
- 3) The student ID must be returned when you withdraw.

4. Application to Another University

- 1) A student may submit an application to another university and take the entrance examination by obtaining the approval of the Dean of the Graduate School of Engineering Science. (Contact the Graduate School of Engineering Science Section to obtain the necessary application form.)
- 2) If you successfully pass the entrance examination to another university, immediately follow the steps to withdraw from our university.

5. Procedure for Going Abroad

Follow the necessary procedure by referring to "Procedure for Going Abroad" on the website of the Graduate School of Engineering Science (<http://www.fse.ynu.ac.jp/education/index.html>). Make sure to start preparing well in advance as some steps may take time.

6. Notifications

Notification	Place of submission	Timing/Deadline	Remarks
Change of the student's address	Educational Affairs Division, Student Affairs and International Relations Department (second floor of the International Student Center)	After any change	
Change of domicile			
Change of surname or given name			Attach a copy of the family register
Change of address of parents, etc.			
Change of the student's permanent domicile			
Overtime research	Register through the Electronic Management System for Overtime Research (http://www.rms.ynu.ac.jp/)		Overtime research notification can be submitted instead of an application for borrowing a facility if research needs to be continued after 21:00, overnight, or during holidays.
Internship report		After the internship is over	The form is available on the website of the Graduate School of Engineering Science (http://www.fse.ynu.ac.jp/education/index.html). * Submit it as an attachment to an email.

7. Issuance of Certificates

- (1) Certificates of enrollment (Japanese/English), transcripts (Japanese/English), certificates of expected completion (Japanese/English), student discount certificates for public transportation, and health certificates can be issued by automated certificate-issuing machines.
- (2) Other certificates cannot be issued immediately. Check the necessary application form and place of submission, then go to the specified office to fill in and file the necessary application.

8. Issuance of Certificates after the Program Completion

Go to the YNU website to learn how to apply for certificates.

If you have any questions, contact the Graduate School of Engineering Science Section by phone (+81-45-339-3817).

9. Collection of Tuition and Delinquency

Tuition fees will be collected in accordance with the "Regulations on the Collection of Tuition Fees by Yokohama National University and Reminders to Delinquents" (<http://somu-somu.ynu.ac.jp/gakugai/kisoku/act/frame/frame110000184.htm>). Pay attention to the date of automatic withdrawal, etc.

IV T-type Engineering Degree (TED) Program, Professional Science Degree (PSD) Program, and Science Degree Program

IV-1 Process from the Planning of Enrollment and Research to Graduation (Obtaining the Degree)

1. Purpose

Students of the T-type Engineering Degree (TED) Program, Professional Science Degree (PSD) Program, and Science Degree Program are assigned to laboratories for in-depth specialized learning. The research and education are conducted mainly in the form of courses and instructions on writing a thesis.

Courses offered in master's programs are classified into categories and types mainly according to their contents and intended targets. Categories mainly depend on the contents of courses and are divided into information science courses, science courses, engineering courses, and professional courses.

Types mainly depend on the intended target and are divided into school-wide courses, department-wide courses, and specialized courses.

The study and research in these courses must be planned to clarify the purpose for enrolling in a master's or doctoral program and to achieve the purpose (obtaining a degree).

2. Academic Advisors and the Study Plan (Enrollment and Research)

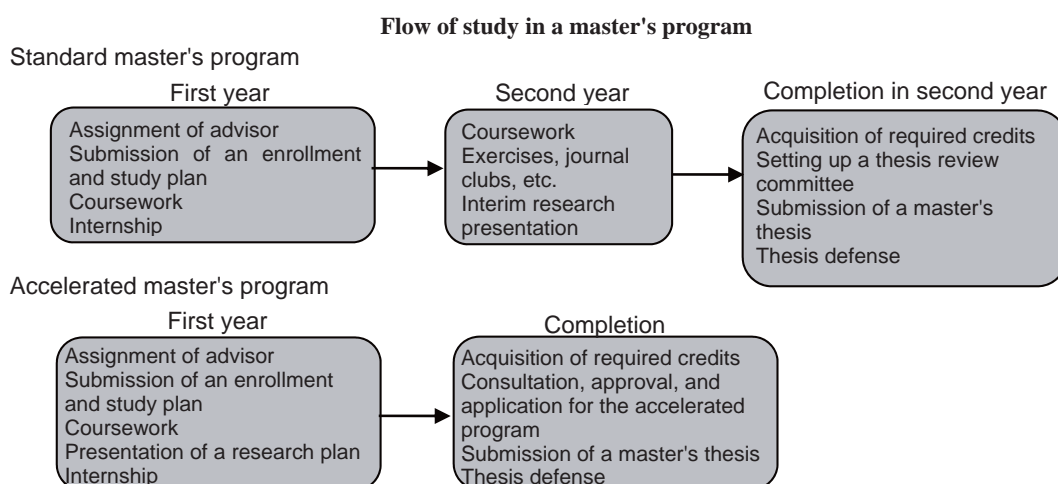

- 1) An academic advisor is assigned immediately after a student is admitted to a program.
- 2) Each student must develop a Course Registration Plan according to the purpose of their study, academic background, and learning ability while seeking due guidance and advice from the advisor, and obtain approval.
- 3) Complete the enrollment within the enrollment period and submit the Course Registration Plan with the signature and seal of the academic advisor attached (refer to page 6).
- 4) Refer to page 6 to learn how to enroll in courses.

The Course Registration Plan must be followed through in each academic year.

- 5) The progress of the plan must be discussed with the academic advisor in each academic year.

3. Flow of Study

Study refers to students' initiatives to learn and academically train themselves. The flows of study at our master's and doctoral programs are presented below.

Flow of study in a doctoral program

Standard doctoral program

Accelerated doctoral program

4. Enrollment Procedure, etc.

- 1) Please read "III-1 Enrollment Procedure" carefully.
- 2) If you have any questions, contact your academic advisor, the academic affairs and library officer of the graduate school, or the Graduate School of Engineering Science Section.
- 3) It is necessary to obtain approval for the enrollment and study plan from your advisor before submitting it to the Graduate School of Engineering Science Section.

5. Necessary Credits and Requirements for Graduating

The number of necessary credits and other requirements for completing the master's and doctoral programs are presented in the following table.

Requirements for completing the TED/PSD/Science Programs at the Graduate School of Engineering Science

Master's programs

Courses		Necessary number of credits	
School-wide core courses	Information course group	At least 2 credits	At least 6 credits
	Science course group	At least 2 credits from courses and course groups specified by the department [*]	
	Engineering course group		
	Professional course group		
Department-wide core courses	Information course group	At least 2 credits from courses and course groups specified by the department [*]	At least 4 credits
	Science course group		
	Engineering course group		
Specialized courses		At least 10 credits from courses specified by the department. Exercise courses in the second year (4 credits in total) are required. [*2]	
Number of necessary credits (total)		At least 30 credits (with GPA of 2.0 or greater)	

*1: The TED Program only requires credits from the engineering course group while the PSD Program only requires credits from the science course group, but there is no requirement for specific courses for both programs.

The Science Degree Program requires the following courses.

• Required school-wide core courses

At least two credits from Algebra, Geometry, Analysis, and Data Science (all of them are courses classified as Mathematical Science)

• Required department-wide core courses

Algebra, Geometry, Analysis, Probability A, Probability B, and Statistics (all of them are courses in Advanced Mathematical Science)

*2: Refer to pages 48 through 57 to find out courses specified by each department and other required courses.

* Courses from other departments and specializations can be taken as department-wide core courses or specialized courses.

Doctoral programs

Courses	Necessary number of credits
Advanced exercises	3 credits
Number of necessary credits (total)	At least 9 credits (with a GPA of 2.0 or greater)

6. Cross-enrollment Between Master's and Doctoral Programs

Master's programs

Students of master's programs may not take courses offered in doctoral programs.

Doctoral programs

Students of doctoral programs may take specialized lecture courses offered in master's programs according to the guidance and advice from their advisors.

7. Enrollment in Courses Offered by Other Graduate Schools or Other Universities

Master's and doctoral programs

According to the guidance and advice from their advisors, students of the TED, PSD, and Science Programs can substitute up to 10 credits from specialized courses by taking courses offered at other departments in the Graduate School of Engineering, as well as the Graduate School of Urban Innovation, Graduate School of Environment and Information Science, Graduate School of Education, Graduate School of International Social Sciences (up to six credits only), and other graduate schools from partner universities of YNU for credit transfers (lectures only).

Prior to any such enrollment, contact the Graduate School of Engineering Science Section. The enrollment cannot be made without the approval of the faculty responsible for the intended course.

8. Enrollment in Foreign Language Courses

Master's and doctoral programs

- 1) Credits from foreign language courses are not counted as credits required to complete a study program. However, a student who has taken courses in one foreign language (non-native) during their master's or doctoral program may be exempted from language examination during their doctoral thesis defense.

The abovementioned language examination is conducted for international students in a non-native language (including Japanese).

- 2) Foreign language courses are not offered at the Graduate School of Engineering Science. Consult with the Graduate School of Engineering Science Section if you wish to take introductory foreign language courses (see page 11).
- 3) International students can take Japanese language courses and other courses in Japanese affairs (see page 11).

9. Accelerated Programs

Master's programs

A standard master's program lasts two years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

Doctoral programs

A standard doctoral program lasts three years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

10. Academic Thesis

No credits are given for academic theses for obtaining a degree.

(1) Thesis defense, etc.

Students who are certain that they satisfy the requirements for completing their master's or doctoral programs must apply for a thesis defense. The application must be filed while they are still enrolled. Submission deadlines for applications are presented below. Students will receive notifications on the procedure and schedule for completing each program at appropriate timings from the Graduate School of Engineering Science Section through their academic advisors. For more details on the thesis defense, refer to the Thesis Defense Regulation of YNU's Graduate School of Engineering Science.

Master's programs

Follow the deadlines specified according to specializations

Doctoral programs

December for completion in March

March for completion in June

June for completion in September

September for completion in December

(2) Awarded degrees and specializations

The following academic degrees are awarded according to the department in which a master's or doctoral program is completed.

Program	Department	Specialization	Degree
Master's program	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Master (Engineering)
		Materials Science Frontier	Master (Engineering)
		Systems Design for Ocean-Space	Master (Engineering)
		Aerospace Engineering	Master (Engineering)
	Chemistry and Life Science	Chemistry	Master (Science)
		Applied Chemistry	Master (Engineering)
		Chemistry Applications and Life Science	Master (Engineering)
		Energy and Sustainable Chemistry	Master (Engineering)
	Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences	Master (Science)
		Physics	Master (Science)
		Applied Physics	Master (Engineering)
		Information Systems	Master (Engineering)
		Electrical and Computer Engineering	Master (Engineering)
Doctoral programs	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Doctor (Engineering)
		Materials Science Frontier	Doctor (Engineering)
		Systems Design for Ocean-Space	Doctor (Engineering)
	Chemistry and Life Science	Chemistry	Doctor (Science)
		Applied Chemistry	Doctor (Engineering)
		Chemistry Applications and Life Science	Doctor (Engineering)
	Mathematics, Physics, Electrical Engineering and Computer Science	Mathematical Sciences	Doctor (Science)
		Physics	Doctor (Science)
		Applied Physics	Doctor (Engineering)
		Information Systems	Doctor (Engineering)
		Electrical and Computer Engineering	Doctor (Engineering)

(3) Evaluation standards for academic theses

Theses papers are evaluated according to the following standards set by each department.

	Master's programs	Doctoral programs
Mechanical Engineering, Materials Science, and Ocean Engineering	<p>Engineering (TED)</p> <ol style="list-style-type: none"> 1. Original research that was conducted with a suitable choice of theme; 2. Results of the research make a significant academic or practical contribution; 3. Results are reliable; and 4. The reasoning, composition, and expression in the thesis are appropriate. 	<p>Engineering (TED)</p> <p>In addition to the standards for master's programs presented on the left:</p> <ol style="list-style-type: none"> 1. The research produces new and advanced results that substantially contribute to the development of the field; and 2. The thesis content is good enough to be published in scientific journals.
Chemistry and Life Science	<p>Engineering (TED) and Science (PSD)</p> <ol style="list-style-type: none"> 1. The research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; 2. The methodology for the research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; and 3. The master's thesis is structured and written in a logical and original manner and produces significant results in academic or engineering terms. 	<p>Engineering (TED) and Science (PSD)</p> <ol style="list-style-type: none"> 1. The research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; 2. The methodology for the research project is appropriate and meaningful according to scientific and technological standards in the area of specialization; and 3. The doctoral thesis is structured and written in a logical and original manner, produces significant results in academic or engineering terms, and has a universal value.
Mathematics, Physics, Electrical Engineering and Computer Science	<p>Engineering (TED), Science (PSD), and Science Degree</p> <ol style="list-style-type: none"> 1. The research agenda of the thesis is useful in engineering terms, has a universal scientific value, or appropriate in other ways; 2. The research method in the thesis is appropriate (e.g., experiment method, calculation method, etc.); 3. Research results and consideration are appropriate, logical, and original; and 4. The structure and expressions used in the thesis are appropriate. 	<p>Engineering (TED), Science (PSD), and Science Degree</p> <ol style="list-style-type: none"> 1. The research agenda of the thesis is useful in engineering terms, has a universal scientific value, or appropriate in other ways; 2. The research method in the thesis is appropriate (e.g., experiment method, calculation method, etc.); 3. Research results and consideration are appropriate, logical, and original; and 4. The structure and expressions used in the thesis are appropriate.

(4) Ethical review

Immediately before any doctoral thesis defense (a thesis revised after the preliminary review of all departments in the Graduate School of Engineering Science), the academic advisor will check that it has proper copyright protection by using iThenticate. The application is then submitted to the thesis review committee. Before the final review, the committee examines the thesis while also checking that proper consideration has been given to copyright. The committee states the review results in the doctoral thesis review report.

11. Working Students

Aside from the method mentioned earlier, students admitted under the exceptional educational method stipulated in Article 14 of the Standards for the Establishment of Graduate Schools (hereinafter called "working students") will be enrolled in the following manner:

(1) Exceptions for working students

- 1) Working students must attend courses full time for at least one year of the standard period for each program (two years in master's programs and three years in doctoral programs).
- 2) Courses are offered in the evening on working days (17:50–19:20) as an exception, although working students may also take courses offered in the daytime and all other timeslots.
- 3) During the mandatory full-time study for one year in a master's program, they must make an enrollment plan to acquire the necessary credits from evening classes (17:50–19:20) in order to properly conduct their master's research. In other words, during this period, daytime courses should only be taken when such courses are not offered in the evening.
- 4) Once admitted, they must seek guidance from their academic advisors and develop an enrollment and study plan for two years of master's program or three years of doctoral program.
- 5) If it is impossible to complete the program in the standard period of study due to professional reasons, they should consider making an enrollment and study plan for three to four years of master's program or four to six years of doctoral programs.
- 6) Working students should declare and gain approval for any change in their enrollment and study plan made as an exception.

(2) Exceptions for making the most of available courses

Non-working students may take courses according to the abovementioned exceptions when their academic advisors acknowledge that there is such a need.

V Pi-type Engineering Degree (PED) Program

V-1 Process from the Planning of Enrollment and Research to Graduation (Obtaining the Degree)

1. Purpose

The advanced manufacturing pursued in PED Programs refers to the following set of activities by scientists and engineers who engage in creative designing:

- Develop the best system under multiple conflicting technical constraints.
- Incorporate results from advanced analysis and measurements into manufacturing accurately.
- Embody free and flexible ideas and concepts under given conditions.
- Conduct design and development based on accurate knowledge while considering the environment and safety.
- Apply basic principles and design future manufacturing to add specific functions.

The education and guidance under PED Programs are directed by the following basic policy to cultivate practical engineers and researchers who will lead advanced manufacturing.

- (1) The education is mainly conducted through laboratory courses, exercises, and trainings in a small group. These activities that are directly linked with manufacturing are called "studios." As part of the studio work, we recommend doing long-term internships conducted at companies in close partnership with the Graduate School of Engineering Science.
- (2) Students must take "modules" that are systematically composed of studios and internship courses.

According to this basic policy, no master's thesis is assigned in master-level PED Programs. The completion is judged based on the portfolio compiling the results from a studio. In each studio, a sufficient amount of time is designated for paper assignments and presentation guidance to strengthen students' logical thinking and scientific writing skills, as well as to cultivate the communication skills that are required for them to play active roles in the society as practitioners. Similar to other programs, each student is asked to write a doctoral thesis in doctor-level PED Programs, but they are evaluated as practitioners in pursuit of advanced manufacturing, rather than researchers who are engaging in basic research.

Before beginning their studies, each student must develop an adequate study plan to clarify the purpose for enrolling in a master's or doctoral program and to achieve the purpose (obtaining a degree).

2. Academic Advisors and the Study Plan

- 1) Modules and an academic advisor are assigned immediately after a student is admitted to a program (with possible adjustments if there are more interested students than available space in respective modules).
- 2) Each student must develop a Course Registration Plan according to the purpose of their study, academic background, and learning ability while seeking due guidance and advice from the module manager of the assigned module or the academic advisor, and obtain approval.
- 3) Complete the enrollment within the enrollment period and submit the enrollment and study plan with the signature and seal of the academic advisor attached (refer to page6').

- 4) Refer to page 6 to learn how to enroll in courses.
- 5) The Course Registration Plan must be followed through in each academic year.
- 6) As necessary, the Course Registration Plan must be revised properly according to the guidance and advice from the module manager of the assigned module or the advisor.

3. Flow of Study

The flow of study is outlined below.

Flow of study in a master's program

Flow of study in a doctoral program

Accelerated program (mainly for working doctoral students with solid accomplishments)

4. Enrollment procedure, etc.

- 1) Please read "III-1 Enrollment procedure" carefully.
- 2) If you have any questions, contact your academic advisor, the academic affairs and library officer of the graduate school, or the Graduate School of Engineering Science Section.
- 3) It is necessary to obtain approval for the enrollment and study plan from your advisor before submitting it to the Graduate School of Engineering Science Section.

5. Necessary Credits and Requirements for Graduating

The number of necessary credits and other requirements for completing the master's and doctoral programs are presented in the following table.

Requirements for completing the PED Program at the Graduate School of Engineering Science

Master's programs

Courses		Necessary number of credits	
School-wide core courses	Information course group Science course group Engineering course group	• At least 2 credits from information course group	At least 6 credits
	Practical course group	• 2 credits required from Presentation English	
Specialized module [*1,2]		At least 4 modules (24 credits) (Completion of 1 module requires at least 4 credits from studio courses and 2 credits from the course group that makes up the module) [*3]	
Number of necessary credits (total)		At least 30 credits (with a GPA of 2.0 or greater)	

- *1 A studio course that makes up a specialized module (master's program) is usually conducted in one semester. In principle, only one studio course from studio course hours can be taken in one semester.
- *2 Internship courses are assigned according to each assigned module in a master-level PED Program. They are conducted in close partnership with the manufacturing industry. The number of necessary credits is determined based on the internship period. Assignments are determined based on discussions between the partners and the Graduate School of Engineering Science. The school plans internship courses to accomplish the educational goals of the PED Program, so students can substitute one studio from a specialized module that is closely related to the internship assignment (pay attention to the note below marked with asterisk). For this reason, remember that an internship course that can substitute a studio course is different from any internship program carried out by students based on their free will and initiatives.
- *3 The same subject cannot be used as a substitute for more than one specialized module.

* Note regarding the substitution of a studio course with an internship course

- Anyone who wishes to substitute a studio course with an internship course should register both courses during enrollment.

[Time schedule code: N000000, Course name: Studio course (for substitution)]

- The module manager proposes the substitution of studio with internship to the academic affairs and library officer of the graduate school.
- Submit an internship report via email to the Graduate School of Engineering Science Section immediately after the completion of an internship program. After receiving the report, the Graduate School of Engineering Science Section will proceed to substitute the corresponding studio. The report template can be downloaded from the website of the Graduate School of Engineering Science.
- Any courses that substituted a studio will be marked with an "i" at the end of the course name in transcripts or the like.

* Restriction of public access to a portfolio according to the confidential agreement for internship programs

In case the submission of studio outputs and portfolios from an internship course to replace a studio course is constrained by a confidential agreement with the host company or their patent application, consult with the Graduate School of Engineering Science Section to handle the confidential agreement and other requirements individually.

Doctoral programs

Courses	Necessary number of credits
Specialized module (doctor) [*4,5]	At least 1 module (completion of 1 module requires at least 4 credits from studio courses and 2 credits from the course group that makes up the module)
Number of necessary credits (total)	At least 9 credits (with a GPA of 2.0 or greater)

- *4 A doctoral thesis written and submitted to complete the Pi-type Engineering Degree (PED) Program is reviewed with respect to the candidate's level of achievement as a practice-oriented research. Similarly, the performance in a doctor-level studio course that makes up a specialized module is evaluated by a faculty group. The module will be offered until the candidate can demonstrate adequate accomplishment.
- *5 For the same reason as above, an internship in the doctor-level PED Program is conducted in close partnership with the manufacturing industry until the candidate can demonstrate adequate accomplishment. The internship can substitute one studio among special modules from the candidate's doctoral program that are closely related to the internship assignment.

6. Cross-enrollment Between Master's and Doctoral Programs

Master's programs

Students of master's programs may not take courses offered in doctoral programs.

Doctoral programs

Students of doctoral programs may take specialized lecture courses offered in master's programs according to the guidance and advice from their advisors. Note however, that they cannot substitute lectures and other courses (two credits) that are needed to complete a specialized module.

7. Enrollment in Courses Offered by Other Graduate Schools or Other Universities

Master's and doctoral programs

According to the guidance and advice from their module managers and advisors, students can obtain credits by taking courses offered at the Graduate School of Engineering that are not included in their modules, and lecture courses offered at other graduate schools of YNU that are our credit transfer partners (Graduate School of Urban Innovation, Graduate School of Environment and Information Science, Graduate School of Education, and Graduate School of International Social Sciences), as well as other graduate schools from the partner universities of YNU for credit transfers.

Prior to any such enrollment, contact the Graduate School of Engineering Science Section. The enrollment cannot be made without the approval of the faculty responsible for the intended course.

8. Enrollment in Foreign Language Courses

Master's and doctoral programs

- 1) Credits from foreign language courses are not counted as credits required to complete a study program. However, a student who has taken courses in one foreign language (non-native) during their master's or doctoral program may be exempted from language examination during their doctoral thesis defense. The language examination is conducted for international students in a non-native language.
- 2) Foreign language courses are not offered at the Graduate School of Engineering Science. Consult with the Graduate School of Engineering Science Section if you wish to take introductory foreign language courses (see page 11).
- 3) International students can take Japanese language courses and other courses in Japanese affairs (see page 11).

9. Accelerated programs

Master's programs

A standard master's program lasts two years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

Doctoral programs

A standard doctoral program lasts three years, but it can be completed after at least one year of enrollment if a student has conducted excellent research that was acknowledged by the faculty council to have satisfied requirements for accelerated programs.

10. Academic theses

No credits are given for a portfolio developed during the master-level PED Program nor for a doctoral thesis written during the doctor-level PED Program for obtaining a degree.

(1) Thesis defense, etc.

Students who are certain that they satisfy the requirements for completing their master's or doctoral programs must apply for a portfolio review or thesis defense. The application must be filed while they are still enrolled. Submission deadlines for applications are presented below. Students will receive notifications on the procedure and schedule for completing each program at appropriate timings from the Graduate School of Engineering Science Section through module managers or their academic advisors.

After they have successfully completed their thesis defense in their respective specializations, students must upload their final portfolios to the Learning Management System.

Master's programs

Follow the deadlines specified according to specializations

Doctoral programs

December for completion in March

March for completion in June

June for completion in September

September for completion in December

(2) Awarded degrees and specializations

The following academic degrees are awarded according to the department in which a master's or doctoral program is completed.

Program	Department	Specialization	Degree
Master's program	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Master (Engineering)
		Materials Science Frontier	Master (Engineering)
		Systems Design for Ocean-Space	Master (Engineering)
		Aerospace Engineering	Master (Engineering)
	Chemistry and Life Science	Chemistry Applications and Life Science	Master (Engineering)
	Mathematics, Physics, Electrical Engineering and Computer Science	Applied Physics	Master (Engineering)
		Information Systems	Master (Engineering)
		Electrical and Computer Engineering	Master (Engineering)
Doctoral programs	Mechanical Engineering, Materials Science, and Ocean Engineering	Mechanical Engineering	Doctor (Engineering)
		Materials Science Frontier	Doctor (Engineering)
		Systems Design for Ocean-Space	Doctor (Engineering)
	Chemistry and Life Science	Chemistry Applications and Life Science	Doctor (Engineering)
	Mathematics, Physics, Electrical Engineering and Computer Science	Applied Physics	Doctor (Engineering)
		Information Systems	Doctor (Engineering)
		Electrical and Computer Engineering	Doctor (Engineering)

(3) Evaluation standards for academic theses

Portfolios and theses papers are evaluated according to the following standards set by each department.

	Master's programs (portfolios)	Doctoral programs
Mechanical Engineering, Materials Science, and Ocean Engineering	<ol style="list-style-type: none">1. Appropriate choice of theme and studio agenda;2. Results of the research make a significant academic or practical contribution;3. Results are acknowledged to have a high level of accomplishment and are reliable; and4. The structure and expressions used in the portfolio are appropriate.	<ol style="list-style-type: none">1. The research agenda of the thesis is useful in engineering terms or appropriate in other ways;2. The research method in the thesis is appropriate (e.g., experiment method, calculation method, etc.);3. Research results and consideration are appropriate, logical, and original; and4. The structure and expressions used in the thesis are appropriate.
Chemistry and Life Science	<ol style="list-style-type: none">1. Clarity and adequacy of the research theme;2. Adequacy of the experiment method and consideration;3. Academic significance in the research area;4. Adequacy of the model and description of the portfolio;5. Adequacy of literature; and6. Consistent logical structure.	
Mathematics, Physics, Electrical Engineering and Computer Science	<ol style="list-style-type: none">1. The studio agenda of the portfolio is useful in engineering terms or appropriate in other ways;2. The research method in the portfolio is appropriate (e.g., experiment method, calculation method, etc.);3. The results and consideration from the studio project presented in the portfolio are appropriate, logical, and original; and4. The structure and expressions used in the portfolio are adequate.	

(4) Ethical review

Immediately before any doctoral thesis defense (a thesis revised after the preliminary review of all departments in the Graduate School of Engineering Science), the academic advisor will check that it has proper copyright protection by using iThenticate. The application is then submitted to the thesis review committee. Before the final review, the committee examines the thesis while also checking that proper consideration has been given to copyright. The committee states the review results in the doctoral thesis review report.

11. Working students

Aside from the method mentioned earlier, students admitted under the exceptional educational method stipulated in Article 14 of the Standards for the Establishment of Graduate Schools (hereinafter called "working students") will be enrolled in the following manner:

(1) Exceptions for working students of master's programs

- 1) Working students must attend courses full time for at least one year of the standard period for each program (two years in master's programs and three years in doctoral programs).
- 2) Courses are offered in the evening of working days (17:50–19:20) as an exception, although working students may also take courses offered in the daytime and all other timeslots.
- 3) During the mandatory full-time study for one year in a master's program, they must make an enrollment plan to acquire the necessary credits from evening classes (17:50–19:20) in order to properly conduct their master's research. In other words, during this period, daytime courses should only be taken when such courses are not offered in the evening.
- 4) Once admitted, they must seek guidance from their module manager or the like and develop an enrollment and study plan for two years of master's program or three years of doctoral program.
- 5) If it is impossible to complete the program in the standard period of study due to professional reasons, they should consider making an enrollment and study plan for three to four years of master's program or four to six years of doctoral programs.
- 6) Working students should declare and gain approval for any change in their enrollment and study plan made as an exception.

(2) Exceptions for working students of doctoral programs

- 1) Courses are offered in the evening of working days (17:50–19:20) and the weekend (7.5 classes in two days) although working students may also take courses offered in the daytime and all other timeslots.
- 2) Working students should declare and gain approval for any change in their enrollment and study plan made as an exception.

(3) Exceptions for making the most of available courses

Non-working students may take courses according to the abovementioned exceptions when their module managers acknowledge that there is such a need.

Course List

- Notes
- Classification: 「e」 indicates Engineering course group, 「s」 indicates Science course group, 「i」 indicates Information course group and 「p」 indicates Professional course group.
 - Schedule code: (S) indicates Spring semester and (F) indicates Fall semester.
 - Language of instruction: 「J」 indicates Japanese and 「E」 indicates English

※1: Only one of these courses can be taken. Consult with your academic advisor or the academic affairs officer regarding your intended enrollment.

※2: Research guidance course.

Students specializing in aerospace engineering can take only one of the combinations of [Seminar in Mechanical Engineering A / Seminar in Mechanical Engineering B].

[Exercise in Materials Engineering A / Exercise in Materials Engineering B], and [Exercise in Ocean and Space Engineering System A and Exercise in Ocean and Space Engineering System B].

※3: Consult with your academic advisor or the academic affairs officer regarding your intended enrollment. Only one of the nine courses can be taken.

Chemistry and Life Science

※1: Only one of these courses can be taken. Consult with your academic advisor or the academic affairs officer regarding your intended enrollment.

※2: Students must acquire ①【Exercise in Chemistry S / F , Exercise in Energy and Sustainable Chemistry BS / BF】 or

②【Seminar A in Chemistry Applications and Life Science, Seminar B in Chemistry Applications and Life Science, Seminar AS in Energy Chemistry, Seminar AF in Energy Chemistry】.

The students who takes 【Exercise in Energy and Sustainable Chemistry BS】 and 【Exercise in Energy and Sustainable Chemistry BS】 must acquire 【Exercise for Effective Presentation in Chemistry (TED)】.

It is not possible to take both of ① and ②.

Mathematics, Physics, Electrical Engineering and Computer Science

specialized courses】Applied Physics/Information Systems Engineering/Electrical and Computer Engineering

In the specializations of Applied Physics and Electrical and Computer Engineering, at least six credits must be acquired from the engineering course group. In the specialization of Information Systems, at least six credits must be acquired from the information course group. (These six credits can be acquired from compulsory courses or compulsory elective courses as well.)

※1: Required at least 4 credits.

※1: Only one of these courses can be taken. Consult with your academic advisor or the academic affairs officer regarding your intended enrollment.

VI-2 Doctoral programs

<T-type Engineering Degree (TED) Program, Professional Science Degree (PSD) Program, and Science Degree Program>

Mechanical Engineering, Materials Science, and Ocean Engineering

Numbering	Schedule code	Course name	Instructor	Credits	Style of class	Academic tutorials	Grade	Term	Year	Language of instruction	Night/Weekend	Remarks
ESd6553	(F) QA10014	Advanced Mechatronics Design	SATO YASUKAZU	2	Lectures		1・2	Fall	Even	E		
ESd6552	(S) QA10021	Advanced Ultra High-speed Machining	SHINOZUKA JUN	2	Lectures		1	Spring	Odd	E		
ESd6551	(F) QA10034	Advanced Lectures on Fracture Mechanics	AKIWA YOSHIKI	2	Lectures		1	Fall	Even	E		
ESd6554	(S) QA10041	Advanced Turbo Machinery	MATSUI JUN	2	Lectures		1・2・3	Spring	Odd	J		
ESd6554	(S) QA10051	Advanced Rarefied Gas Dynamics	MATSUMOTO HIROAKI	2	Lectures		1・2	Spring	Even	E		
ESd6557	(S) QA10061	Robotic Manipulation	MAEDA YUUSUKE	2	Lectures		1	Spring	Even	E		
ESd6611	(F) QA10074	Space Propulsion Engineering, Advanced	YOSHINORI TAKAO	2	Lectures		1・2	Fall	Odd	E		
ESd6551	(S) QA10081	Advanced Lectures on Elastoplasticity Theory	OZAKI SHINGO	2	Lectures		1・2	Spring	Odd	E		
ESd6611	(F) QA10094	Advanced Computational Fluid Dynamics	KITAMURA KEIICHI	2	Lectures		1・2	Fall	Odd	E		
ESd6551	(S) QA10101	Non-linear Structural Simulation	YU QIANG	2	Lectures		1・2	Spring	Odd	E		
ESd6436	(F) QA10114	In-depth lecture on micro manipulation	FUCHIWAKI OHMI	2	Lectures		2	Fall	Odd	E		
ESd6556	(F) QA10124	Special issues on mechanical system control	SANADA KAZUSHI	2	Lectures		1	Fall	Odd	E		
ESd6555	(F) QA10134	Thermo-Fluid Dynamics of Combustion	ISHI KAZUHIRO	2	Lectures		1・2・3	Fall	Even	E		
ESd6554	(F) QA10144	Topics on Applied fluid dynamics	HYAKUTAKE TORU	2	Lectures		1・2	Fall	Even	E		
ESd6554	(S) QA10151	Turbulence Measurement	NISHINO KOICHI	2	Lectures		1・2・3	Spring	Even	E		
ESd6436	(S) QA10161	Optical Microfabrication Engineering	MARUO SHOJI	2	Lectures		1・2	Spring	Even	E		
ESd6555	(S) QA10171	Advanced Combined Heat Transfer	SAKAI SEIGO	2	Lectures		1・2・3	Spring	Even	E		
ESd6554	(F) QA10184	Advanced Applied Thermofluid Engineering	ARAKI TAKUTO	2	Lectures		1・2・3	Fall	Even	E		
ESd6234	(F) QA10194	Advanced Cyber-Robotics	KATO RYU	2	Lectures		1・2	Fall	Odd	E		
ESd6443	(F) QA10204	Advanced Thin Film Fabrication	HIROKI OHTA	2	Lectures		1・2	Fall	Even	E		
ESd6555	(F) QA10214	Thermal and Fluid Engineering for Electric Rotating Machinery	KABATA YASUO	2	Lectures		1・2・3	Fall	Even	J		
ESd6553	(F) QA10224	Virtual Design Engineering	IWAKI CHIKAKO	2	Lectures		1・2・3	Fall	Even	J		
ESd6552	(F) QA10234	Surface Treatment Technology	WADA KUNIHICO	2	Lectures		1・2・3	Fall	Even	J		
ESd6011	(S) QA11101 (F) QA11104	Advanced Study in Mechanical Engineering	Each Instructor (Mechanical Engineering)	3	Seminars	○	1・2・3	Spring・Fall	Every	J		
ESd6015	(S) QA11201 (F) QA11204	Teaching Practice in Mechanical Engineering	Each Instructor (Mechanical Engineering)	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6014	(S) QA11301 (F) QA11304	Off-Campus Exercise in Mechanical Engineering	Each Instructor (Mechanical Engineering)	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6012	(S) QA11401 (F) QA11404	Advanced Study in Mechanical Engineering	Each Instructor (Mechanical Engineering)	1	Seminars		1・2・3	Spring・Fall	Every	J		
ESd6014	(S) QA19811 (F) QA19814	Overseas Internship in Mechanical Engineering	Each Instructor (Mechanical Engineering)	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6562	(S) QA20011	Optical Semiconductor Technology	MUKAI KOKI	2	Lectures		1・2	Spring	Even	E		
ESd6594	(S) QA20021	Advanced Fracture Mechanics of Materials	HASEGAWA MAKOTO	2	Lectures		1・2	Spring	Even	E		
ESd6594	(S) QA20031	Special lecture of multi-functional composites	NAKAO WATARU	2	Lectures		1・2	Spring	Odd	E		
ESd6552	(F) QA20044	Advanced Material Forming Process	MAENO TOMOYOSHI	2	Lectures		1・2	Fall	Odd	E		
ESd6441	(F) QA20054	Advanced Functional Material Engineering	NAKATSUGAWA HIROSHI	2	Lectures		1・2	Fall	Odd	E		

Numbering	Schedule code	Course name	Instructor	Credits	Style of class	Academic tutorials	Grade	Term	Year	Language of instruction	Night/Weekend	Remarks
ESd6594	(F) QA20064	Fatigue of Metallic Materials	UMEZAWA OSAMU	2	Lectures		1・2	Fall	Every	E		
ESd6591	(F) QA20074	Local Equilibrium Theory	HIROSAWA SHOICHI , et.al.	2	Lectures		1・2	Fall	Even	E		
ESd6591	(F) QA20084	Leading-edge Materials Engineering	UMEZAWA OSAMU	2	Lectures		1・2	Fall	Every	J		
ESd6594	(F) QA20094	Application of Design and Engineering of High-Temperature Structural Materials	TODA YOSHIKI	2	Lectures		1・2	Fall	Every	E		
ESd6591	(F) QA20104	Advanced Computational Modeling of Phase Transformation and Microstructure Evolution	SHIMONO MASATO	2	Lectures		1・2	Fall	Every	E		
ESd6595	(F) QA20114	Microstructure Design in Advanced Materials	MITARAI YOKO , et.al.	2	Lectures		1・2	Fall	Every	E		
ESd6443	(S) QA20121	Advanced thin film technology	OHTAKE MI TSURU	2	Lectures		1・2・3	Spring	Odd	E		
ESd6021	(S) QA21101 (F) QA21104	Advanced exercise in Materials Engineering	UMEZAWA OSAMU , et.al.	3	Seminars	○	1・2・3	Spring・Fall	Every	J		
ESd6025	(S) QA21201 (F) QA21204	Teaching Practice in Materials Engineering	UMEZAWA OSAMU , et.al.	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6024	(S) QA21301 (F) QA21304	Off-Campus Exercise in Materials Engineering	UMEZAWA OSAMU , et.al.	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6022	(S) QA21401 (F) QA21404	Advanced Study in Materials Engineering	UMEZAWA OSAMU , et.al.	2	Seminars		1・2・3	Spring・Fall	Every	J		
ESd6024	(S) QA29811 (F) QA29814	International Internships in Materials Engineering	UMEZAWA OSAMU	1	Exercise		1・2・3	Spring・Fall	Every	E		
ESd6612	(F) QA30014	Advanced Exercises in Computational Hydrodynamics	HINO TAKANORI	2	Lectures		1・2・3	Fall	Every	E		
ESd6612	(F) QA30024	Structural Information System	KAWAMURA YASUMI	2	Lectures		1・2・3	Fall	Every	E		
ESd6612	(F) QA30034	Advanced Ship and Marine Structural Design Methodologies	OKADA TETSUO	2	Lectures		1・2・3	Fall	Every	E		
ESd6611	(S) QA30041	Advanced Spacecraft Attitude Control	UENO SEIYA	2	Lectures		1・2・3	Spring	Every	E		
ESd6612	(F) QA30054	Advanced Seakeeping Qualities	HIRAKAWA YOSHIKI	2	Lectures		1・2・3	Fall	Every	E		
ESd6611	(S) QA30061	Advanced Aircraft Aerodynamic Design	MIYAJI KOJI	2	Lectures		1・2・3	Spring	Every	E		
ESd6612	(S) QA30071	Advanced Ocean Resources and Energy Engineering	NISHI YOSHIKI	2	Lectures		1・2・3	Spring	Every	E		
ESd6612	(F) QA30084	Advanced Theory in Dynamics of Floating Bodies Engineering	MURAI MOTOHIKO	2	Lectures		1・2・3	Fall	Every	E		
ESd6611	(F) QA30094	Advanced Aerospace Utilization Engineering	HIGUCHI TAKEHIRO	2	Lectures		1・2・3	Fall	Every	E		
ESd6612	(F) QA30104	Advanced Engineering Turbulence	YOUHEI TAKAGI , et.al.	2	Lectures		1・2・3	Fall	Every	E		
ESd6612	(F) QA30114	Advanced Maritime Traffic Safety	FUKUTO JUNJI , et.al.	2	Lectures		1・2・3	Fall	Every	E		
ESd6612	(S) QA30121	Advanced Engineering for Ocean Development	KATOH SYUNJI	2	Lectures		1・2・3	Spring	Every	E		
ESd6612	(S) QA30131	Advanced Systems Engineering Theory of Ship Design	MITSUYUKI TAIGA , et.al.	2	Lectures		1・2・3	Spring	Every	E		
ESd6031	(S) QA31101 (F) QA31104	Advanced Exercises in Ocean and Space System Engineering	Each Instructor , et.al.	3	Seminars	○	1・2・3	Spring・Fall	Every	J		
ESd6032	(S) QA31201 (F) QA31204	Advanced Study in Ocean and Space System Engineering	Each Instructor , et.al.	2	Seminars		1・2・3	Spring・Fall	Every	J		
ESd6035	(S) QA31301 (F) QA31304	Teaching Practice in Ocean and Space System Engineering	Each Instructor , et.al.	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6034	(S) QA31401 (F) QA31404	Off-Campus Exercise in Ocean and Space System Engineering	Each Instructor , et.al.	1	Exercise		1・2・3	Spring・Fall	Every	J		
ESd6034	(S) QA39811 (F) QA39814	International Internship in Ocean and Space System Engineering	Each Instructor	1	Exercise		1・2・3	Spring・Fall	Every	E		

Chemistry and Life Science

Numbering	Schedule code	Course name	Instructor	Credits	Style of class	Academic tutorials	Grade	Term	Year	Language of instruction	Night/Weekend	Remarks
ESh6522	(S) QB10011	Organometallic chemistry	MINATO MAKOTO	2	Lectures		1・2・3	Spring	Even	E		
ESh6603	(S) QB10021	Catalysis engineering	INAGAKI SATOSHI	2	Lectures		1・2・3	Spring	Even	E		
ESh6603	(F) QB10034	Catalyst Design	KUBOTA YOSHIHIRO	2	Lectures		1・2・3	Fall	Odd	E		
ESh6531	(S) QB10041	Photoresponsive Materials	UBUKATA TAKASHI	2	Lectures		1・2・3	Spring	Even	E		
ESh6544	(F) QB10054	Electrochemical Devices	DOKKO KAORU	2	Lectures		1・2・3	Fall	Odd	E		
ESh6533	(S) QB10061	Chemistry of Functional Polymers	OYAMA TOSHIYUKI	2	Lectures		1・2・3	Spring	Odd	E		
ESh6521	(S) QB10071	Solution Theories	SAKOMURA MASARU	2	Lectures		1・2・3	Spring	Even	E		
ESh6532	(F) QB10084	Advanced Course on Organic Electron-transfer Chemistry	ATOBE MAHITO	2	Lectures		1・2・3	Fall	Even	E		
ESh6592	(F) QB10095	Ceramic Materials Design	TATAMI JUNICHI	1	Lectures		1・2・3		Every	E		
ESh6601	(F) QB10105	Advanced Powder Processing and Materials Engineering	IJIMA MOTOYUKI	1	Lectures		1・2・3		Every	E		
ESh6521	(F) QB10114	Photochemistry and Spectroscopy	SEKI KANEKAZU	2	Lectures		1・2・3	Fall	Odd	E		
ESh6521	(S) QB10121	Quantum theory for large systems	SATO KOTA	2	Lectures		1・2・3	Spring	Even	E		
ESh6507	(F) QB10134	Astrobiology Special Lecture	KEBUKAWA YOKO	2	Lectures		1・2・3	Fall	Even	E

【core courses】

Classification	Numbering	Schedule code	Course name	Instructor	Credits	Style of class	Academic tutorials	Grade	Semester	Year	Language of instruction	Remarks
p	ESa5002	(S) N000011	Multi-disciplinary Problem Based Learning in Graduate School of Engineering Science	TAKADA HAJIME , et.al.	2	Lectures		1・2	Spring	Every	J	
p	ESa5006	(A) N00002A (B) N00002B (C) N00002C (D) N00002D (E) N00002E (F) N00002F	Presentation English	ANDO YOSHITAKA	2	Lectures		1・2	Spring・Fall	Every	E	Required course of PED Program (A-D : Spring semester, E-F : Fall Semester)
p	ESa4006	(A) N00003A (B) N00003B (C) N00003C (D) N00003D	Presentation English S, Basic Level	INADA MASATOSHI , et.al.	2	Lectures		1・2	Spring	Every	E	In charge of (A),(B) class: INADA MASATOSHI In charge of (C),(D) class: KAYABUKI TADASHI
p	ESa4006	(A) N00003A (B) N00003B	Presentation English F, Basic Level	INADA MASATOSHI , et.al.	2	Lectures		1・2	Fall	Every	E	In charge of (A) class: INADA MASATOSHI In charge of (C) class: KAYABUKI TADASHI
p	ESa4181	(S) N000051	Engineering Ethics for Risk Management	TAKADA HAJIME , et.al.	2	Lectures		1	Spring	Every	J	This course is the Lecture among the course group that makes up the module (1)-(6) in the Department of Mechanical Engineering, Materials Science and Ocean Engineering. Also in the Department of Mathematical, Physics, Electrical Engineering and Computer Science.
p	ESa4004	(F) N000064	Innovation and New Business II	HANEJI NOBUO , et.al.	2	Lectures		1・2	Fall	Every	J	
p	ESa4002	(S) N000071	Project Management I	MASAKI KADONO	2	Lectures		1・2	Spring	Every	E	
p	ESa4002	(S) N000081	Project Management II	MASAKI KADONO	2	Lectures		1・2	Spring	Every	E	
p	ESa4002	(S) N000091	Professional Engineering I	MAKI IWAKUMA , et.al.	2	Lectures		1・2	Spring	Every	J	
p	ESa4002	(F) N000104	Professional Engineering II	MAKI IWAKUMA , et.al.	2	Lectures		1・2	Fall	Every	J	
p	ESa4002	(S) N000111	The Professional Ethics in EU & US	KITAGAWA TATSUO , et.al.	2	Lectures		1・2	Spring	Every	E	
p	ESa4002	(S) N000121	Effective Business Planning in Global Companies	CHOTOKU YUJI	2	Lectures		1・2	Spring	Every	J	
p	ESa4002	(S) N000131	Next Generation's Business Skills as a Global Standard	YAMAGUCHI HIROSHI	2	Lectures		1・2	Spring	Every	J	
p	ESa4002	(S) N000141	Innovation and Challenges I	HANEJI NOBUO , et.al.	2	Lectures		1・2	Spring	Every	J	
p	ESa4002	(S) N000151	Innovation and Challenges II	HANEJI NOBUO , et.al.	2	Lectures		1・2	Spring	Every	J	
p	ESa4002	(S) N000161	Standardization and Business	MANABU ETO , et.al.	2	Lectures		1・2	Spring	Every	J	
p	ESa4002	(S) N000171	Technological subject in Kanagawa prefecture	TAMECHIKA EMI	2	Lectures		1・2	Spring	Every	J	
p	ESa9004	(S) N009811 (F) N009814	Oversea Internship for Science Engineering	UMEHARA IZURU	2	Exercise		1・2	Spring・Fall	Every	J	
i	ESb4554	(S) NA10011	Computational Fluid Engineering	MATSUI JUN	2	Lectures		1	Spring	Every	E	
e	ESb4554	(F) NA10024	Turbulence Phenomena	NISHINO KOICHI	2	Lectures		1・2	Fall	Every	E	This course is the Lecture among the course group that makes up the module (1)-(6) in the Department of Mechanical Engineering.
s	ESb4444	(F) NA20014	Introduction to Materials for Electronics and Optoelectronics	MUKAI KOKI	2	Lectures		1・2	Fall	Every	E	This course is the Lecture among the course group that makes up the module (1)-(6) in the Department of Mechanical Engineering.
e	ESb4594	(F) NA20024	Introduction of multi-functional composites	NAKAO WATARU	2	Lectures		1・2	Fall	Every	E	
e	ESb4612	(F) NA30014	Ship Motions in Waves	HIRAKAWA YOSHIKI	2	Lectures		1・2	Fall	Every	E	
e	ESb4612	(F) NA30024	Introduction to Ocean Resources and Energy Engineering	NISHI YOSHIKI	2	Lectures		1・2	Fall	Every	E

VI-4 Doctoral programs

<Pi-type Engineering Degree (PED) Program>

【specialized module】

Mechanical Engineering, Materials Science, and Ocean Engineering

Studio courses

Module Title	Schedule code	Studio courses name	Instructor	Credits	Style of class	Grade	Term	Remarks
Advanced Design of Processing Systems	(S) QA15101 (F) QA15104	Sub-Research Studio A in Mechanical Engineering	Each Instructor (Mechanical Engineering)	2	Exercise	1・2・3	Spring・Fall	
	(S) QA15201 (F) QA15204	Sub-Research Studio B in Mechanical Engineering	Each Instructor (Mechanical Engineering)	2	Exercise	1・2・3	Spring・Fall	

Related Lecture courses that make up the module

Schedule code	Course name	Instructor	Credits	Style of class	Grade	Term	Remarks
(S) QA10021	Advanced Ultra High-speed Machining	SHINOZUKA JUN	2	Lectures	1	Spring	
(F) QA10034	Advanced Lectures on Fracture Mechanics	AKINIWA YOSHIKI	2	Lectures	1	Fall	
(S) QA10081	Advanced Lectures on Elastoplasticity Theory	OZAKI SHINGO	2	Lectures	1・2	Spring	
(S) QA10101	Non-linear Structural Simulation	YU QIANG	2	Lectures	1・2	Spring	
(S) QA10161	Optical Microfabrication Engineering	MARUO SHOJI	2	Lectures	1・2	Spring	
(F) QA10204	Advanced Thin Film Fabrication	HIROKI OHTA	2	Lectures	1・2	Fall	
(F) QA10214	Thermal and Fluid Engineering for Electric Rotating Machinery	KABATA YASUO	2	Lectures	1・2・3	Fall	
(F) QA10224	Virtual Design Engineering	IWAKI CHIKAKO	2	Lectures	1・2・3	Fall	
(F) QA10234	Surface Treatment Technology	WADA KUNIHICO	2	Lectures	1・2・3	Fall	
(S) QA19811 (F) QA19814	Overseas Internship in Mechanical Engineering	Each Instructor (Mechanical Engineering)	1	Exercise	1・2・3	Spring・Fall	

Studio courses

Module Title	Schedule code	Studio courses name	Instructor	Credits	Style of class	Grade	Term	Remarks
Advanced Design of Thermal and Fluid Systems	(S) QA15101 (F) QA15104	Sub-Research Studio A in Mechanical Engineering	Each Instructor (Mechanical Engineering)	2	Exercise	1・2・3	Spring・Fall
