

# October 2024 Application Guidelines

## Master's Program

### (Special Admission for Japanese Government Scholarship Recipients) ,

## Yokohama National University

## Graduate School of Engineering Science

### How to Apply

All applicants must send a set of all required documents by post after applying online.

#### 1. Required environment for the application

In order to complete the application procedure, applicants need PCs connected to the Internet, printers and their own email address.

#### 2. Overview of the Application Procedure

##### Step 1 – Register

- 1) Visit YNU Web Application System;  
<https://e-apply.jp/e/ynu/>
- 2) Select the preferred Department, etc. according to the guidance of the window.
- 3) Register your name, e-mail address, and other personal information.
- 4) You will receive a confirmation email after registration procedure is completed.

##### Step 2 – Apply online

- 1) Log in to YNU Web Application System, and fill in all the required information.
- 2) Select payment method for your application fee after you apply.
- 3) Pay the application fee as your choice.
- 4) After you have received an email that your payment was confirmed, print out all the documents via the YNU Web Application System.

##### Step 3 – Submission of the application documents

- 1) Send all the printed-out application documents and other required certificates by post in the designated application period.
- 2) Application procedure is only completed when YNU received all required documents by post.

Note: You **must** submit printed-out documents by post in order to complete the application. Only filling out the online application is not enough to successfully complete the application procedure.

Please read the instructions of this application guideline and the YNU Web Application System carefully.

## Introduction

This booklet provides application guidelines for admission to master's programs at the Graduate School of Engineering Science (Special Admission for Japanese Government Scholarship Recipients) of Yokohama National University in October 2024.

Prospective students are requested to carefully read this extensive booklet, find the information that pertains to them, and apply with the correct procedures based on an accurate understanding.

File an application after close consultation with your prospective supervisor or with faculty members serving as contact persons in Table 1 (see page 5).

Go to the website of the Graduate School of Engineering Science, Yokohama National University to find out about the school and see research conducted by each faculty member.

<https://www.fse.ynu.ac.jp/index.html>

### [Security export control]

Pursuant to the Foreign Exchange and Foreign Trade Act, Yokohama National University (YNU) stipulates YNU Regulations for Security Export Control to rigorously screen admission of international students with respect to exported goods, technical assistance, and people-to-people exchange. Accordingly, some international students may have limited access to research and educational programs despite their preference. Be aware of such restrictions and consult with your intended supervisor prior to filing your application. All enrolled students, regardless of nationality, are requested to sign a pledge to comply with the Foreign Exchange and Foreign Trade Act. For more details, visit the following website of the YNU's Research Initiatives and Promotion Organization.

<https://www.ripo.ynu.ac.jp/researcher/start/security/>

### [Handling of personal information]

Personal information will be handled under the Act on the Protection of Personal Information and the Policies on the Protection of Personal Information held by YNU.

- (1) Personal information provided in the applicant's entrance examination results and application materials may also be used for the following purposes in addition to those related to the selection of applicants for admission to YNU.
  - ① Contacting successful applicants (sending materials related to welfare benefits such as scholarships and insurance, events after admission, and Co-op) and enrollment procedures.
  - ② Organizing classes after enrollment and sending materials related to welfare such as entrance fee waiver (except for international students) and tuition fee waiver upon application by the applicant.

- ③ Academic affairs after enrollment (student registration management, academic guidance, etc.)
- ④ Public relations, surveys and research at the university (including surveys and analysis for the improvement of admission selection methods and university education)
- ⑤ Personal information of enrolled students may be provided to the extent necessary for enrollment procedures for the YNU Alumni Association.

When presenting the results of surveys and research, the information will be processed in such a way that individuals cannot be identified.

Personal information will not be used or provided for any other purposes.

- (2) When using the information in the various works described in (1) above, some of the operations may be performed by a contractor entrusted by YNU. All or part of the personal information obtained will be provided to the contractor to the extent necessary to perform the work entrusted to the contractor.

## [Student Dormitory]

Those who wish to move into the dormitories should check the application guide on the Student Dormitories page of the Student Support Division website of the Academic Affairs and International Strategy Department and complete the application procedures within the time frame.

<https://www.gakuseisupport.ynu.ac.jp/>

## [IMPORTANT]

The selection method may be modified due to any changes in unforeseen circumstances related to natural disasters, man-made disasters, epidemics etc. As for the latest information, please visit the "Admissions" page on the Graduate School's website (<https://www.fse.ynu.ac.jp/english/index.html>) regularly.

## 2. Eligibility

Of the Japanese Government Scholarships<sup>[Note 1]</sup>, Eligibility is acknowledged for applicants with any of the following profiles:

- (1) Graduates or prospective graduates (prior to admission to our graduate school) from universities defined in Article 83 of the School Education Act
- (2) Applicants who have completed or are expected to complete (prior to admission to our graduate school) 16 years of school education in another country
- (3) Applicants who have completed or are expected to complete (prior to admission to our graduate school) 16 years of school education in Japan by taking correspondence courses offered by foreign schools
- (4) Applicants who have completed or are expected to complete (prior to admission to our graduate school) programs in Japan specified by the Minister of Education, Culture, Sports, Science and Technology among educational facilities that are recognized as universities according to the school education systems of other countries (completion of such programs must be recognized as completion of 16 years of school education in those countries)
- (4) -2 At the relevant university or other overseas school (limited to institutions accredited by the party recognized by the country's government or relevant institutions, or those designated to be such by the Minister of MEXT, in regard to comprehensive education and research activities), you have received a degree corresponding to a bachelor's degree through the completion of three or more years of study (including the completion of the relevant study in Japan of correspondence courses from the relevant overseas schools and the completion of coursework at academic institutions positioned in the education system of the relevant country designated in the preceding item).
- (5) Applicants whose academic achievements were assessed individually by our graduate school and are acknowledged to be comparable or superior to graduates from universities, and who will reach age 22 by the time they enroll in our graduate school <sup>[Note 2, 3]</sup>

[Note 1] At the time of application, it is a Japanese Government Scholarship (Research Student), or it is decided to adopt it.

[Note 2] Eligibility (5) can be claimed by persons who cannot claim Eligibility (1)–(4) -2, but whose academic capacity is recognized to be comparable or superior to a university graduate after individual assessment of their eligibility by our graduate school, and who will be over 22 years of age by the time they enroll in our graduate school.

※Typically, applicants claiming eligibility as well as international students who graduated universities that do not require 16 years of study and either have or will have conducted at least one year of research as research students or researchers at Japanese or foreign universities, inter-university research institutes, or comparable research institutes prior to admission to our graduate school.

[Note 3] Applicants wishing to claim Eligibility (4) -2 and (5) must first undergo an eligibility assessment. Consult with faculty members of your desired field and submit the following documents in an envelope to the Graduate School of Engineering Science Section between **Monday, May 13 and Wednesday, May 15, 2024**. Application documents are

accepted by post or directly at the section office as long as they meet the deadline. (The section office is open from 9:00 a.m. until 5:00 p.m. except for a break from 12:45 p.m. to 1:45 p.m.)

**[Documents submitted by applicants claiming Eligibility (4) -2, (5)]**

- [1] Detailed statement of application documents (Attachment 1)
- [2] Application for certificate of eligibility (Form 12)
- [3] Eligibility Accreditation Record (Form 13)
- [4] Certificate of (expected) graduation or enrollment period from the most recent educational level
- [5] Transcript from the most recently completed educational level
- [6] Record of Research Achievements (Form 16)
- [7] (Desired) Research Plan (Form 17)
- [8] An addressed return envelope (Size-L3) with 354 yen worth of stamps for express mail

The eligibility assessment is conducted by the Graduate School of Engineering Science, Yokohama National University. The result is delivered by post on **Monday, May 27, 2024**. If your eligibility is recognized, proceed by applying within the specified period. If you have any questions, contact the Graduate School of Engineering Science Section.

### **3. Application procedure**

After applying online, enclose the application documents (Please see below 4) in a Size-2 envelope (24 cm × 33.2 cm). Download the label for filing an application (Form 30) from YNU Web Application System. Attached the filled-out label to the envelope and send it via registered mail from the post office window.

#### **3-1. Online Application**

The online application form must be completed during the period **between Friday, May 24, and Tuesday, June 4, 2024**.

TEL : 0120-202079 (Reception time : from Monday to Friday, 10:00 – 18:00)  
Email : [cvs-web@career-tasu.co.jp](mailto:cvs-web@career-tasu.co.jp)

Only filling out the online application is not enough to successfully complete the application

procedure. Send all the application forms printed out and other required materials by post. Please see below 3-2 to 4.

### 3-2. Application by post

Submit your application documents by registered mail **between Friday, May 31 and Thursday, June 6, 2024.**

Applications are only accepted by registered mail and only during the application period. No direct applications are accepted, nor is application by email.

Send your application as early as possible keeping in mind the time required for delivery by the postal service lest it reach us after the deadline and be rejected. As an exception, an application sent by **registered express mail that is postmarked by the originating post office by Wednesday, June 5, 2024** will be accepted even if it reaches us after the deadline.

[Note 1] Some post offices do not provide postal services on Saturdays, Sundays, and holidays. Make sure to check the schedule of your local post office.

[Note 2] Applicant who lives in abroad should send application documents by post through representative who lives in Japan. In the case of sending documents from abroad as needed, please send by recorded mail such as EMS (Express Mail Service) to reach us no later than **June 6, 2024.** 【by due date without fail】 However, return address is only in Japan.

[Note 3] We accept the application documents at the reception counter only through academic supervisor who gave provisional acceptance letter to applicant who lives in abroad.

### 3-3. Address for filing an application

Graduate School of Engineering Science Section  
Yokohama National University  
79-5 Tokiwadai, Hodogaya-ku, Yokohama, 240-8501 JAPAN

## 4. Application documents

Necessary designated forms should be downloaded from the YNU Web Application System and the Graduate School's website. Be sure to print them only on **one side of white A4-sized paper.**

[Note] Exemption from submission of certain documents

Applicants claiming Eligibility (4) -2 and (5) do not need to resubmit documents that have already been submitted for the application for certificate of eligibility

## 5. Admission ticket for examination

We inform you by e-mail that we have officially accepted the application by **Wednesday, June 19, 2024**. In accordance with the notes stated in the e-mail, please login to YNU Web Application System and print out the Admission ticket for examination. Please attach the same photo as the photo attached to the Application for admission on the printed Admission ticket and bring it on the examination day. You **must not** write anything

on both the front and the back of your admission ticket.

## 6. Screening methods

Academic abilities are tested based on the score from an English proficiency tests (either TOEIC or TOEFL), written examinations on Subject I and Subject II, along with review of application documents and interviews.

Go to 8(1) to find out how the written examinations are conducted. During interviews, applicants are requested to present their past research and answer questions to judge their suitability to our programs. Applicants who miss a written examination on Subject I or II or the interview, or if they fail to submit valid TOEIC or TOEFL score certificates will not be admitted.

## 7. Schedule for examination and interview

Date	Subject	Score	Remarks
-	English	100	Screening is based on original score certificates of TOEIC or TOEFL.
Wednesday August 21	Subject I	200 (Unit of Chemistry Applications and Life Science: 300 points)	10:30–12:30
	Subject II	200 (Unit of Chemistry Applications and Life Science: 100 points)	13:30–15:30 (Except for Unit of Advanced Chemistry and Unit of Chemistry Applications and Life Science). Date and venue for Oral examination will be specified by the announcement of the assigned examination room (see below)
Wednesday, August 21 to Thursday, August 22	Interview	-	Date and venue for examination will be specified by the announcement of the assigned examination room (see below).

- Examinees must enter their assigned rooms 20 minutes prior to their written examinations.
- Score certificates of TOEIC or TOEFL (For details, see below "(9): TOEIC and TOEFL scores ".) are collected during the examination on Subject I.
- Language dictionaries (electronic dictionaries are not acceptable) may be used for academic exams only.
- Applicants may use only Japanese or English in their answers in the academic subjects and

interviews.

- The written examination and interview are conducted on the campus of the Yokohama National University in Tokiwadai, Hodogaya-ku, Yokohama.
- Room assignment will be posted on YNU Web Application System **by Friday, August 2, 2024.**

## 8. Examination

(1) Screening by written examination: Academic subjects for examination

Unit	Subject I (200 points) (Unit of Chemistry Applications and Life Science: 300 points)	Subject II (200 points) (Unit of Chemistry Applications and Life Science: 100 points)
Mechanical Engineering	[1] Mathematics (50 points) [2] Thermodynamics (50 points) [3] Material mechanics (50 points) A total of 150 points are converted into 200 points	[1] Mechanical dynamics (50 points) [2] Hydrodynamics (50 points) [3] Control engineering (50 points) A total of 150 points are converted into 200 points
Materials Science Frontier	[1] Analysis (differentiation, integration, and differential equations) [2] Linear algebra (matrices and their applications, and simultaneous linear equations) [3] Mechanics [4] Physical chemistry (thermodynamics) [5] Statistical physics 5 questions in total (40 points each)	[1] Material mechanics [2] Solid-state electron theory [3] Crystal plasticity [4] Metallography I (crystal, phase diagrams, and related fields) [5] Metallography II (diffusion, recovery, recrystallization, phase transformation, and related fields) 5 questions in total (40 points each)
Systems Design for Ocean-Space	[1] Analysis (differentiation, integration, and differential equations) [2] Linear algebra (50 points) [3] Rigid-body dynamics (50 points) A total of 150 points are converted into 200 points	[1] Hydrodynamics (50 points) [2] Material dynamics (50 points) [3] Vibration engineering (50 points) [4] Marine engineering (vessel statics and stability) (50 points) [5] Aerospace engineering (mechanics of mass points of aircraft and cosmonautic vehicles) (50 points) Answer 3 questions out of 5 options. A total of 150 points are converted into 200 points
Advanced Chemistry	[1] Mathematics (analysis, linear algebra, and differential equations) [2] Basic inorganic chemistry [3] Basic analytical chemistry [4] Basic physical chemistry [5] Basic organic chemistry 5 questions in total (40 points each)	Oral examination is conducted on the basic knowledge of overall chemistry as well as the specialized knowledge related to the intended research field and a submitted Summary of research to date and research plan (200 points)

Chemistry Applications and Life Science	<p>[1] Mathematics involving linear algebras, analysis, and differential equation</p> <p>[2] Basic chemistry I involving basic inorganic chemistry and basic analytical chemistry</p> <p>[3] Basic chemistry II involving basic physical chemistry and basic organic chemistry.</p> <p>[4] Chemical engineering basics involving transport phenomena, mass/energy balances, and phase equilibrium.</p> <p>4 questions in total (75 points each)</p>	Oral examination is conducted on the basic and specialized knowledge related to the examinee's previous research and/or intended research field (100 points)

Electrical and Computer Engineering	<p>[1] Linear algebras (100 points)</p> <p>[2] Calculus (100 points)</p>	<p>[1] Electromagnetics (50 points)</p> <p>[2] Circuit theory (50 points)</p> <p>[3] Logic circuit (50 points)</p> <p>[4] Algorithm (50 points)</p>

(2) Instructions for examination on academic subjects

Unit	Instruction
Mechanical Engineering	None
Materials Science Frontier	None
Systems Design for Ocean-Space	None
Advanced Chemistry	Alpha calculators without programming functions may be used.
Chemistry Applications and Life Science	Alpha calculators without programming functions may be used.
Mathematical Sciences	None
Physics	None
Electrical and Computer Engineering	None

## 9. TOEIC and TOEFL scores

The score certificates from the following tests are reviewed in the examination.

Examined test	Score certificate to be submitted	Official website
TOEIC Listening & Reading Test (public test)	Official Score Certificate	TOEIC ( <a href="https://www.iibc-global.org/english/toEIC/test/lr.html">https://www.iibc-global.org/english/toEIC/test/lr.html</a> )

TOEFL-iBT (Including Home Edition and Paper Edition)	Test Taker Score Report/ Examinee Score Report	TOEFL ( <a href="https://www.ets.org/toefl.html">https://www.ets.org/toefl.html</a> )
--	---	--

**\*1 Performance in TOEIC Bridge, TOEIC Speaking & Writing Test, TOEFL-PBT or institutional testing programs such as TOEIC IP and TOEFL ITP is not acknowledged.**

**\*2 For TOEIC Listening & Reading Test (public test), the Digital Official Score Certificate with QR codes are also accepted. In this case, please submit a printout of your TOEIC the Digital Official Score Certificate. We verify their authenticity using the QR code displayed on the Digital Official Score Certificate.**

**\*3 Score certificates from TOEFL need to be submitted on the date of the examination. Our university does not accept any score certificates sent directly from ETS.**

- Submit a score certificate from TOEIC or TOEFL **on the day of your examination (Original only, no copies are accepted above in the case of \*2 above. The same rule applies elsewhere.)**. Score certificates are collected during the examination on Subject I for screening by written examination.
- Submit an original score certificate from a test taken **in the last two years** counting from the date of submission and must include a photograph of the applicant. (However, for the entrance examinations listed in this Guideline, score certificates submitted within two years of the last day of the application period are also valid.) Applicants who submit invalid score certificates or fail to submit certificates at the designated time during the examination **will not be admitted**.
- [About TOEFL score] Graduate School of Engineering Science does not recognize “My Best Scores” written on “Test Taker Score Report”.
- TOEIC and TOEFL scores are converted according to the following tables into a scale of 100 points and are counted as the examination on foreign language (English).

[Conversion method for TOEIC scores]

TOEIC	Conversion method	Foreign language (English)
349 points or less	0	0 points
350–500 points	$(\text{TOEIC} - 350) / 3$	0–50 points
500–800 points	$(\text{TOEIC} - 500) / 6 + 50$	50–100 points
801 points or more		100 points

[Conversion methods for TOEFL-iBT]

- Scores are rounded to the nearest whole number.
- Submitted score certificates will not be returned to applicants.

## 10. Announcement of successful applicants

**Thursday, September 5, 2024 around 4:00 p.m.**

Acceptance letters are sent to successful applicants by post. In addition, registration numbers of successful applicants are posted on the website of the Graduate School of Engineering Science (<https://www.fse.ynu.ac.jp/index.html>).

[Note 1] The acceptance letter is the sole document entailing our official acceptance.

[Note 2] We do not respond to any inquiries regarding the outcome of the examination via phone calls and so forth.

## 11. Admission Period

( 1 ) Admission Period : **Friday, September 6– Thursday, September 12, 2024**

( 2 ) Admission fee and Tuition fee : not charged to Japanese Government Scholarships.

**Applicants who do not complete the necessary procedures during the admission period will be considered to have withdrawn from admission.**

## 12. Prior consultation by applicants who need special consideration for their examination or studies

Prior to application, any applicants with physical or mental disabilities who require special consideration for their examination or studies must declare that fact to the Graduate School of Engineering Science Section using the form below.

Applicants who experienced accidents or unexpected trouble must also immediately declare any need for special consideration for their examination or studies.

Please contact us if you are not sure what classification applies to your situation.

[How to apply]

- (1) Prepare your application by following the example below and attach a copy of a medical certificate or physical disability certificate, and another supporting document.
- (2) Consult with us as early as possible before filing your application as it may take time for us to make accommodations for your request depending on its nature.
- (3) Place of submission and inquiry  
Graduate School of Engineering Science Section, Yokohama National University

3. Requested special consideration for taking the examination
4. Requested special consideration for studies after enrollment
5. Special consideration made by the school where the applicant was enrolled
6. Other

(Attachment) Copy of medical certificate or physical disability certificate, and another supporting document

### 13. Reminders

- (1) Inadequately prepared application documents may be rejected.
- (2) No changes may be introduced to documents already submitted for the application procedure
- (3) Application documents are not returned.
- (4) Enrollment may be cancelled even after admission if false statements on application documents come to light.
- (5) Please use the Joyo Kanji characters as much as possible. If you use non-Joyo Kanji characters, the computer may not be able to recognize your name. In such cases, the name may be replaced by a different Kanji character from the one registered on the application form on the acceptance notification and the admission letter.
- (6) Depending on your performance in the entrance examination, you may not be assigned to your desired specialization, educational program or supervisor. Consider your other choice.
- (7) Diplomas and transcripts submitted by applicants may be examined by a certification organization specified by YNU at the applicants' expense when YNU deems it necessary to have a third party authenticate them.
- (8) Any changes related to the entrance examination will be notified to applicants along with announcements on the website of the Graduate School of Engineering Science.
- (9) Always carry your admission ticket for examination on the day of examination.
- (10) Applicants are not admitted if they fail to take the assigned examinations on Subject I or II, or the interview for screening, or if they fail to submit valid TOEIC or TOEFL score certificates.
- (11) Switch off your mobile phones and other devices and put them in your bag before entering your examination room.
- (12) The following acts are considered as fraudulent. In case of misconduct, the exam would

be immediately terminated, and he/she would be expelled from the exam hall. No further exams will be permitted.

In addition, the result of exams that have already been taken will be invalidated.

- ① Cheating. Furthermore, helping other examinees cheat by providing the assistance.
  - ② Opening the question booklet and beginning to answer before the start of the exam.  
Furthermore, holding a pencil or continuing to answer questions without following the instructions to end the exam.
  - ③ Taking the question booklet and answer sheet out of the exam room during the exam.
  - ④ Using electronic devices such as mobile phones, smart phones, wearable terminals, tablet terminals, earphones, etc. and auxiliary tools such as rulers, dictionaries, etc. during the exam. \*Excluding those for which use is permitted.
- (13) The following acts may be considered as fraudulent. If fraudulent activity is recognized, the treatment is the same as (12) above.
- ① Wearing or holding in the hand, without storing in your bag, of electric devices such as mobile phones, smartphones, wearable devices, tablets, earphones, and other electronic devices, rulers, dictionaries, and other aids during the exam. \*Excluding those for which use is permitted
  - ② Doing the conduct that disturbs other examinees in the exam hall, exam room, or waiting room.
  - ③ Not following the instructions of supervisors, etc. in the exam hall, exam room, or waiting room.
  - ④ Doing any other conduct that may impair the fairness of the exam.

## II. Overview of Master's Programs

### 1. Purpose of Education and Research at our Graduate School

Graduate School of Engineering Science at YNU aspire to serve as an international hub of practical science. The effort is led by the Graduate School of Engineering Science, which aims to foster globally competitive scientists and engineers who have sound ethics and enterprising spirits to learn beyond their areas of expertise. We hope to further strengthen and develop the manufacturing industry and other industries by nurturing people who are well versed in both science and engineering.

The master's programs at the Graduate School of Engineering Science offer specialized courses for students to develop their expertise and skills, as well as a wide range of classes in fundamental science designed to help them build a solid foundation, such as courses in mathematical science, school-wide core courses, and department-wide core courses. Students are encouraged to take initiative in their research in order to develop original technologies and acquire new knowledge. In this process, they grow into sophisticated and professional engineers and researchers who can make comprehensive judgments flexibly and respond to unknown problems based on their broad perspectives.

### 2. Description of Departments and Profile of Graduates

#### 2.1 Department of Mechanical Engineering, Materials Science, and Ocean Engineering

Mechanical engineering, material engineering, naval architecture and ocean engineering, and aerospace engineering all seek to build advanced systems and highly functional materials by combining elementary technologies while incorporating basic principles. This department helps students understand these basic principles, develop their scientific intuition in applying those principles, and cultivate the ability to adapt to technical innovation in this globalized world. The learning and research activities in the department seek to build advanced systems and create highly functional materials by bringing together elementary technologies, designing technologies to make the most of elements, and creating production technologies that maintain the balance between our society and the environment. In this manner, our department produces globally-competitive engineers and researchers with practical and sophisticated skills.

##### 2.1.1 Specializations

The Department of Mechanical Engineering, Materials Science, and Ocean Engineering covers the following four specializations. The awarded degree and offered programs are listed next to each specialization.

- Mechanical Engineering: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program
- Materials Science Frontier: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-

type Engineering Degree (PED) Program

- Systems Design for Ocean-Space: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program

- Aerospace Engineering: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program

### 2.1.2 Education Programs

Two different types of education programs are offered at the Department of Mechanical Engineering, Materials Science, and Ocean Engineering to obtain degrees in the specializations listed in the previous section.

- **T-type Engineering Degree (TED) Program (in Mechanical Engineering, Materials Science Frontier, Systems Design for Ocean-Space, and Aerospace Engineering)**

The TED program in Mechanical Engineering welcomes students with basic skills in mechanical engineering who seek to gain advanced skills and expertise in building advanced machines and mechanical systems. The program in Materials Science Frontier welcomes students with basic skills in material engineering and science who seek to learn advanced technologies related to material mechanics and processing, material strength and structure, material function and composition, and material physics and chemistry. The program in Systems Design for Ocean-Space welcomes students with basic skills in naval architecture and ocean engineering who are keen to apply advanced technologies for using marine space and for combining basic technologies. These programs also recruit students who seek to learn aerospace engineering technologies for using the atmosphere and space based on their basic knowledge on mechanical, material, and naval architecture and ocean engineering.

- **Pi-type Engineering Degree (PED) Program (in Mechanical Engineering, Materials Science Frontier, Systems Design for Ocean-Space, and Aerospace Engineering)**

The PED program in Mechanical Engineering welcomes students with basic skills in mechanical engineering who seek to gain practical skills to work globally while addressing issues involving mechanical engineering. The program in Materials Science Frontier welcomes students with basic skills in material engineering and science who seek to learn practical technologies involving material mechanics and processing, material strength and structure, material function and composition, and material physics and chemistry. The program in Systems Design for Ocean-Space welcomes students with basic skills in naval architecture and ocean engineering who are keen to engage in practical and technical challenges involved in the planning, construction, and operation of devices for using marine space. These programs also recruit students who seek to work with practical challenges involving aerospace engineering for using the atmosphere and space based on their basic knowledge on mechanical, material, and naval architecture and ocean engineering.

## 2.2 Department of Chemistry and Life Science

Today's material civilization is built upon comprehensive and advanced science technologies for

developing and applying functional materials based on unique natural science. The important keys for the sustainable development of civilization include the pursuit of exceptional substances and materials, the construction of good production systems, and the understanding and application of life phenomena. To achieve this, a comprehensive system must be built beyond the conventional academic framework of chemistry to incorporate mathematics and information science. This department focuses on chemistry and life science and produces internationally-minded professionals who can adapt to evolving science technologies with their basic competency and comprehensive skills to address a wide range of issues involving nature research, manufacturing, energy, and life forms by applying principles and their knowledge.

### 2.2.1 Specializations

The Department of Chemistry and Life Science covers the following four specializations. The awarded degree and offered programs are listed next to each specialization.

- Chemistry: Master (Science), Professional Science Degree (PSD) Program
- Applied Chemistry: Master (Engineering), T-type Engineering Degree (TED) Program
- Energy and Sustainable Chemistry: Master (Engineering), T-type Engineering Degree (TED) Program
- Chemistry Applications and Life Science: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program

### 2.2.2 Education Programs

Three different types of education programs are offered at the Department of Chemistry and Life Science to obtain degrees in the specializations listed in the previous section.

- **T-type Engineering Degree (TED) Program (in Applied Chemistry, Energy and Sustainable Chemistry, and Chemistry Applications and Life Science)**

The program requires basic knowledge in inorganic chemistry, analytical chemistry, physical chemistry, organic chemistry, and other essential fields related to materials, as well as in material engineering, energy chemistry, catalytic chemistry, polymer chemistry, biochemistry, chemical engineering, bioengineering, and so forth. Students are encouraged to delve deep into their own research questions to search for molecules and materials that produce new functions; build necessary production systems for such materials; create new materials and construct processes that facilitate energy conversion and use; and unravel and apply life phenomena. Students are taught to develop basic research and development skills to flexibly respond to unknown problems by making comprehensive judgments based on their broad perspectives. This program produces professionals with basic skills in chemistry, energy chemistry, and bio and life science who can pay attention to other research areas beyond their field and adapt to evolving science technologies.

- **Pi-type Engineering Degree (PED) Program (Chemistry Applications and Life Science)**

The program consolidates basic knowledge in inorganic chemistry, analytical chemistry, physical chemistry, organic chemistry, and other essential fields related to materials, as well as in material

engineering, chemical engineering, bioengineering, biochemistry, and so forth. The main emphasis is placed on the development of basic skills for pursuing exceptional substances and materials, designing production systems and devices, and integrating their basic knowledge to establish practical technologies to unravel and apply life phenomena. This program covers chemical engineering, energy chemistry, material engineering, bio and life science, and other related areas. It produces globally competitive professionals with practical skills who can adapt to evolving science technologies while exercising their basic skills to apply principles and available information in an integrated manner and respond to a wide range of challenges involving manufacturing, energy, and life forms.

• **Professional Science Degree (PSD) Program (Chemistry)**

In this program, students study designing principles and synthetic methods of molecules and materials and learn about chemical phenomena and properties in order to develop basic skills for making scientific research in such fields of chemistry as inorganic chemistry, analytical chemistry, physical chemistry, organic chemistry, catalytic chemistry, polymer chemistry, electrochemistry, and biochemistry. The additional studies in organic and inorganic material engineering, catalytic engineering, bioengineering, and application of chemistry and life sciences to engineering are intended to build their engineering basics in chemistry. The integrated style of education produces professionals with solid basic skills who can conduct scientific research, as well as contribute to the development of crucial materials for the next generation based on an understanding of basic science in terms of physics and science-oriented chemical industries.

## **2.3 Department of Mathematics, Physics, Electrical Engineering and Computer Science**

The innovation in information and communication technology that has utterly transformed our society owes its remarkable development to electrical, electronic, communication, and information engineering. Further paradigm shifts and innovation require integrated and interdisciplinary understanding in extensive fields from basic science in mathematics and physics to applied engineering. The master's program at the Department of Mathematics, Physics, Electrical Engineering and Computer Science produces globally-competitive, practical, and creative engineers and researchers by offering learning and research opportunities in a wide area including mathematical science, physics, applied physics, as well as electrical, electronic, communication, information, and medical information engineering.

### **2.3.1 Specializations**

The Department of Mathematics, Physics, Electrical Engineering and Computer Science covers the following five specializations. The awarded degree and offered programs are listed next to each specialization.

- Mathematical Sciences: Master (Science), Science Degree Program
- Physics: Master (Science), Professional Science Degree (PSD) Program
- Applied Physics: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program

- Information Systems: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program
- Electrical and Computer Engineering: Master (Engineering), T-type Engineering Degree (TED) Program, or Pi-type Engineering Degree (PED) Program

### 2.3.2 Education Programs

- **T-type Engineering Degree (TED) Program (in Applied Physics, Information Systems, and Electrical and Computer Engineering)**

The program welcomes students with the abovementioned basic academic background who want to develop their expertise further in order to become globally competitive engineers and researchers who can make comprehensive judgments flexibly and respond to unknown problems based on their broad perspectives.

- **Pi-type Engineering Degree (PED) Program (in Applied Physics, Information Systems, and Electrical and Computer Engineering)**

The program welcomes students with the abovementioned basic academic background who aspire to become engineers and researchers who can respond practically to challenges faced by our diversified and advanced industrial society.

- **Professional Science Degree (PSD) Program and Science Degree Program (in Physics, and Mathematical Science)**

The program welcomes students who are able to apply their basic knowledge in physics and mathematical science; aspire to gain expertise in the field they choose and a broader understanding in related fields; and ultimately become globally competitive engineers and researchers.

## IV. Use of ChatGPT and other Generative AI Tools

We are urging our students to take note of the precautions concerning the use of generative AI tools including ChatGPT. Regarding the documents necessary for our entrance examination, please prepare and submit them based on the following reminder. In addition, international students must abide by their national and regional policies, laws, and regulations as required.

### Reminder

Information entered into generative AIs could be used for AI learning or leaked to unintended parties. Furthermore, the source of the information obtained from generative AIs is not clear and may contain fabricated data, biased views, or ethically problematic expressions.

Regarding an application form and other necessary documents, please prepare them in accordance with our Admission Policy and submit them at your own responsibility, ensuring that no wrongdoing is being committed and that no discrepancies in academic skills are suspected after admission.

## V. Access

For details on how to get to the University, please visit the "Access" page on the University's website. (<https://www.ynu.ac.jp/english/about/access/access/>)

[Note 1] Please note that the sidewalks from Hazawa Yokohama Kokudai Station to the university are very narrow in some places, so please be careful.

[Note 2] The number of buses and passengers are limited, and buses are greatly affected by traffic congestion and weather conditions. Therefore, we do not recommend the use of buses on the day of the examination.

## Detailed Statement of Application Documents (Eligibility Assessment) Master's Program at Graduate School of Engineering Science (Japanese Government Scholarship), Yokohama National University

Name \_\_\_\_\_

Unit \_\_\_\_\_

Specialization \_\_\_\_\_

Submit this statement as an attachment along with your application documents. Enclose the necessary documents and put a circle in each corresponding check box.

(Check box)

Application document	Form	Note	Eligibility 4 - 2, 5
Application for certificate of eligibility	12	Print out the form after downloading it from the website of the Graduate School of Engineering Science.	
Eligibility Accreditation Record	13	Print out the form after downloading it from the website of the Graduate School of Engineering Science.	
Certificate of (expected) graduation or enrollment period from the most recent educational level	-	To be prepared by the president or dean of the school where the applicant was or is enrolled.	
Transcript from the school where the applicant was or is enrolled.	-	To be prepared by the president or dean of the school where the applicant was or is enrolled.	
A size-L3 return envelope	-	Write the recipient's name and address on the envelope and affix stamps (354yen). Remember that the recipient must be in Japan.	
Record of Research Achievements	16	Print out the form after downloading it from the website of the Graduate School of Engineering Science.	
(Desired) Research Plan	17	Print out the form after downloading it from the website of the Graduate School of Engineering Science.

Application document	Form	Note	International student
			Japanese Government Scholarship
Application for admission	1-1	Print out the form after downloading it from YNU Web Application System.	
Photo	-	Attach them to your application for admission.	
Government sponsorship certificate	-	No copies are accepted.	
Certificate of (expected) graduation	-	To be prepared by the president or dean of the graduating (enrolled) school.	
Certificate of degree	-	The degree obtained must be stated on the certificate. If a copy of a diploma is used as a substitute, the original must be presented at the Graduate School of Engineering Science Section. This certificate is not required from an applicant claiming Eligibility (1).	
Transcript	-	To be prepared by the president or dean of the graduating (enrolled) school.	
Certificate of resident status	-	Foreigners living in Japan should submit copies of both sides of their residence cards. Other foreigners should submit a copy of their passport.	
Curriculum Vitae	19-1	Print out the form after downloading it from the website of YNU Web Application System. This form is not required from an applicant claiming Eligibility (1).	
Provisional Acceptance Letter	19-2	Print out the form after downloading it from the website of the Graduate School of Engineering Science. Obtain a signature from the prospective supervisor.	
Research Plan (Advanced Chemistry)	21	(Only applicants for Advanced Chemistry Unit should submit) Print out the form after downloading it from the Graduate School's website.	

※Students who have passed an eligibility assessment do not have to resubmit the documents that were submitted for that application.
